Behind the camera

Chris Columbus

A 12-year-old who gets left behind when his family go on holiday, a teenage magician fighting to save his world and the troubled son of a Greek god living in modern-day America: these are just three of the characters brought to life on the big screen by director Chris Columbus. With films such as *Home Alone*, *Harry Potter and the Chamber of Secrets* and *Percy Jackson and the Sea of Monsters*, Columbus has certainly shown that he knows how to get teenagers into the cinema.

Columbus has been making films for more than 30 years and has become one of the most successful film directors of all time. Since he directed his first film, *Adventures in Babysitting*, in 1987, Columbus has been involved in some of the biggest films as both a director and a producer.

Comparisons

1 Read the blog entry. Mark the sentences T (true) or F (false).

- 1 The writer likes awards ceremonies.
- 2 *Gravity* won Best Film at the 2014 Oscars.
- 3 The writer thinks the visual effects in *Gravity* are the best he's ever seen.
- 4 Dave thinks the writer is very intelligent.

Why all these awards?

I'm really tired of awards ceremonies and prizes. Why do we have to compare things? Everywhere you look, there's something going on about who or what is 'the best' or 'the most comfortable' or 'the biggest', and so on. And sometimes the prize winners aren't the best anyway!

Here's an example: the Oscars in 2014. I saw the film *Gravity* and it was the most exciting film I'd ever seen. But did it win the Oscar for Best Film? No! They gave the award to *Twelve Years A Slave*! Can you believe it? It wasn't as good as *Gravity* at all.

OK, *Gravity* was the most successful film at the Oscars – it got seven awards – but I don't think that's enough. Sandra Bullock was fantastic as Dr Ryan. I think she's much better than Cate

Blanchett, who won Best Actress. But the good thing is that *Gravity* won Best Visual Effects – I've never seen anything as fantastic. And was the music good? It was great! No other film had music as brilliant as that.

I said all these things to my friend Dave the day after the Oscars. I told him I thought the judges were the craziest people in the world. Dave asked me how many films I'd seen in 2013. I said, 'One – *Gravity*.' Dave says he doesn't know anyone as stupid as me.

2 **SPEAKING** Work in pairs. Discuss these questions.

- 1 What other awards ceremonies do you know of?
- 2 Do you like awards ceremonies? Why (not)?
- 3 Do you think it's fair to compare different movies, actors, music, etc. and choose one as the best?

3 Complete the sentences with the correct form of the adjectives and adverbs. Add any other necessary words.

- 1 The weather tomorrow won't be _____ (cold) as today.
- 2 This is the _____ (good) pizza I've ever eaten.
- 3 Do you think this is _____ (difficult) than the other test?
- 4 This book's OK, but it isn't the _____ (interesting) one I've ever read.
- 5 She learns things _____ (easy) than I do.

We asked readers to tell us about a time when they tried to help someone. Here's one from Graham Smith.

I used to work in IT for a big company, but I was fired because I got angry with a manager. Here's what happened.

I answered the phone one day and said, 'Hi. Can I help you?' A voice said, 'Hi. I'm a manager in the Sales Department and I've got an IT problem. I need your help.' 'What's the problem?' I asked, and he told me his computer screen had suddenly gone black.

¹ _____, I couldn't think why it had happened. I asked him to check that the screen was still connected. He said it was. ² _____ I asked him if he'd pressed any buttons by mistake. He said, 'No, the computer was installing a program when, suddenly, it went "pooff".'

³ _____ a few seconds, I said, 'OK, please check that your computer is still plugged in at the wall. Sometimes it gets disconnected accidentally.' The manager asked me to wait a bit. Then he came back and said, 'I can't see behind my desk where the plug is. It's very dark.' So I told him to switch the light on. Do you know what he said? 'Oh, I can't put the light on because the electricity went off five minutes ago.'

I tried to keep quiet. ⁴ _____, I had to say something. I warned him never to phone me again, ever. He complained to my boss and I was fired. How fair is that, do you think?

- 3 **SPEAKING** Compare your lists in pairs.

- 4 Read through the blog quickly and answer the questions.
 - 1 Why is the blogger writing this post?
 - 2 Does Jim's story have a happy ending?
 - 3 Is Jim an optimist or a pessimist?

Me, Myself & My view of the World

View #17: It's all about the positivity

Today's view is all about attitude. So many of my friends are often pessimistic. They always think, 'There's a dark cloud up there. It's going to rain soon!' Well, I think we all need to focus more on solutions and less on the problem.

I read a story recently that I want to share with you, and if you're a pessimist, maybe it'll change your attitude a bit too. It's about this kid, Jim. He was a born optimist and a real problem-solver. He was also a very talented 15-year-old student.

Jim could paint, draw, play music – you name it. His biggest passion was photography. He knew all about famous photographers, spent hours looking at photography books, and helped start his school photography club. All he needed was a good camera. He couldn't afford one, of course. 'I'll get a summer job,' he decided. 'As soon as I save up enough, I'll get a digital camera.'

After working at a café all summer, Jim counted his savings. 'Still short, but that's OK,' he thought. 'I'll get a weekend job and I'll have the rest in three months from now.' And so he did. He worked at a supermarket and three months later, Jim announced to his friends: 'I'm picking up my new camera tomorrow. Who wants to come for a photo shoot at the park?'

Wherever Jim went, he carried his camera with him. He took great photos and learned how to use computer software. His Art teacher encouraged him to take part in a national photo contest. 'I'm sure you'll win a prize,' she told him. Jim decided to take a chance. 'Whatever happens, I'm going to choose to enjoy the experience and learn from it,' he said.

Then one day, something terrible happened. Jim was cycling home, when he nearly ran over a cat. He lost control and fell off his bike. Fortunately, Jim was fine, but his camera was damaged. 'The deadline for the contest is in a week. Can you fix it?' he asked the technician. 'I'm afraid it's going to be expensive, Jim, and I can't guarantee it'll work properly.' Jim was desperate. 'All this effort ... for nothing,' he thought. But his optimistic side didn't allow him to give up. With his smartphone, Jim took the photo that won him 3rd prize. The prize was £300 – the exact amount it cost Jim to get his camera fixed.

So listen up, dear readers. Let's try and think positively more often. Actually, I'm on the point of doing this right now. I'm about to play the piano in a concert. I hate playing in public, but I'll choose to learn from the experience. I'll keep an open mind and I won't worry about giving a perfect performance. Anyway, I'd better go. My bus leaves in five minutes. Oh, and I'm off to Spain on Tuesday for a family holiday so I guess I'll post my next update two weeks from now.

5 Read the blog again. Mark the statements T (true) or F (false). Then work with a partner and correct the false statements.

- 1 The blogger is concerned with her own attitudes and those of her friends.
- 2 By the end of the story, Jim's attitude to life changes because of an accident.
- 3 Jim had to work longer than planned to get the camera he wanted.
- 4 Through his passion for photography, Jim learned other skills.
- 5 Jim got his camera fixed in time for the contest.
- 6 The blogger still feels negative about her piano performance.

6 **SPEAKING** Work in pairs. Discuss the questions.

- 1 Did you like the story the blogger used? Do you agree that Jim's positive attitude helped him win a prize?
- 2 Do you think a story like this could change people's attitudes? Say why (not).

TRAIN TO THINK

Learning to see things from a different perspective

How we see a situation influences how we feel about it and how we behave in it. Learning to look at things from a more optimistic perspective can have a positive influence on the outcome of a situation.

1 Read what these people have experienced when trying to look at things from a different perspective. Say what and who helped them change their attitude.

One day I went out with a group of friends, and we met this guy who seemed quite nice. But then I noticed that he started to make fun of the things I said. I became quiet and started to feel bad about myself. When I spoke to my best friend afterwards, she just said, 'So what? That guy's strange but that's him, not you.' So I decided to ignore the guy and he soon stopped making fun of me. More importantly, I felt better about myself.

For a long time, I used to worry about everything all the time. Then we had this discussion in class, and one of my teachers told us a saying I'll never forget. It may sound ridiculous, but it really helped me change my attitude. It basically says, 'For every problem under the sun, there is either a solution or there is none. If there is one, think till you find it. If there is none, then never mind it.'

2 **SPEAKING** Think of any difficult situations where you could usefully apply either of the two perspectives above. Discuss with a partner.

A *Billy Elliot*

Billy Elliot is an 11-year-old boy who lives in the north of England. Billy's mother is dead, and he lives with his father and his brother, who are both coal miners.

Billy's father makes him take up boxing, but he hates it. One day, at the sports centre, Billy sees a group of girls doing ballet lessons and joins the class. But he doesn't tell his father, who believes that dancing is something that girls do, not boys. When Billy's father finds out about the ballet, he gets angry and he doesn't let his son take any more lessons. But Billy carries on in secret because he loves it.

Billy's ballet teacher, Georgia, encourages him to take a test to go to the Royal Ballet School in London. When she tells Billy's father, he says that Billy isn't allowed to dance any more. But then, one day, he sees Billy dancing. He realises that his son is talented, that it's his dream to go to the school in London and that he isn't going to give up dancing. After that, Billy's father does everything he can to help his son. He hasn't got any money, but other people in the town get the money together and then he takes Billy to London for the entrance test. Finally, Billy is accepted at the school and after years of study, he ends up as a top professional ballet dancer.

B *Bend It Like Beckham*

Jess Bhamra is the 18-year-old daughter of an Indian family in London. Jules Paxton is the same age and the daughter of an English family. Jess is crazy about football, but because she's a girl, she isn't allowed to play. Sometimes she plays in the park with some boys and one day, Jules, who also plays football, sees Jess playing. They get on really well and Jules invites Jess to try out for the local women's football team, coached by Joe. When he sees how good Jess is, Joe puts her in the team. When Jess's parents find out that she's been playing football without their knowing, they make her stop.

The team gets to an important final. Unfortunately, the final is on the same day as Jess's sister's wedding. Joe asks Mr

Bhamra to let Jess play, but he refuses. Halfway through the wedding, Mr Bhamra lets Jess go. She rushes to the game.

When she shows up, there are only thirty minutes left and her team are losing 1–0. Soon, the score is 1–1, and when there's a free kick, Jess has to bend the ball around the other team's players to score. She makes it, and the team wins.

A university in California offers soccer scholarships to Jess and Jules. Jess finally convinces her parents to let her go, and Jess and Jules set off for America.

- 1 What do you know about the hobby of birdwatching? Read and find out.
- 2 Read again. What impact did birdwatching have on Phoebe Snetsinger's life?

8,000 Birds to See Before You Die

Phoebe Snetsinger had just returned from a trip to Alaska when her doctors told her that she had cancer. She had less than a year to live. Phoebe was 50. As soon as she heard the news, she decided to spend the rest of her life doing what she loved most – watching birds.

She immediately went off to some of the world's most amazing natural paradises. Her trips were extremely hard. But Phoebe surprised her doctors and her family as she carried on travelling. A year came and went, and she was still alive. She was doing something that she loved and that helped her to be healthy for another ten years.

The cancer came back, but even then Phoebe Snetsinger decided not to stop. As she continued with her trips, the cancer went away again. By now she was becoming internationally famous in the birdwatching world. At the age of 61, when she had seen 7,530 species, she was named 'the world's leading bird spotter' by the Guinness Book of Records.

Four years later, during a trip to Mexico, she set a new record when she spotted species number 8,000: the very rare Rufous-necked Wood-Rail. Snetsinger had become a legend. Nobody had spotted so many different bird species before. In fact, at that time only 12 people around the world had seen more than 7,000 species of birds!

Phoebe's interest in birdwatching started in Minneapolis. Then she moved to Missouri with her family. There, she joined a group of people who were interested in birds, insects and plants around the Mississippi River. She became very worried about pollution and its impact on the environment. 'We have to protect nature,' she said. 'If we don't, future generations won't be able to enjoy watching these beautiful birds.'

Sadly, when Phoebe was 68, she died in a car accident on the island of Madagascar off the East African coast. She was there enjoying the hobby that had probably saved her life. She had been there for two weeks, and had added another five to her list of over 8,400 species. Four years after she died, the American Birding Association published her memoirs, *Birding on Borrowed Time*. Many people have enjoyed reading this moving book. It isn't just a story about a bird spotter's travels, but a touching human document of how her hobby helped her to live much longer than expected.

3 Look at the statements below. Read the article again and decide if each statement is correct or incorrect. If it is correct, mark it A. If it's incorrect, mark it B.

- 1 Phoebe Snetsinger learned about her illness after she came back from Alaska.
- 2 When she got the bad news, she took some time to recover and then started travelling.
- 3 After travelling for about ten years, she had won the fight against her illness forever.
- 4 Only 12 other people were as successful with their bird spotting as Phoebe.
- 5 Phoebe liked breaking records, but she didn't care a lot about the environment.
- 6 When Phoebe finally died of cancer, she was on holiday doing what she loved most.
- 7 Just before she went on her last trip, she published her famous book *Birding on Borrowed Time*.
- 8 The book is both about birdwatching and the heroic way Phoebe got on with her life.

4 **SPEAKING** With a partner, correct the statements marked B.

30
YEARS
FROM
NOW

Many of my friends have no idea where they want to be in 30 years from now, but I have most of my future planned out. First of all, I know I'll be working as a nurse. My grades at school are pretty good and my dream is to have a job with which I can help people. I think by the time I'm about 50, I'll have travelled in many countries around the world working as a nurse. I'm an optimist and I believe that if we all do something to help each other, we can solve the world's problems together.

As for my personal life, I think I'll be living on my own. I don't think I'm going to get married or start my own family. The way I see it, there are enough people on our planet at the moment, so I'll try to make it a better place for them. I'll certainly be enjoying myself with my friends and I'll have all the time in the world for my hobbies. As soon as I save up enough money, I'll buy my own house in a quiet town or village. It'll have a big garden and I'll have lots of dogs. When I wake up in the morning, I'll take them for a walk in the woods and then I'll sit in my garden to have breakfast. It's going to be great!

EXTRA READING

1 **PRE-READING** Do you like dogs? Why do you think Kazakh nomads needed big dogs?

Loyal *tobets* of Kazakhstan

For thousands of years, *tobets* were very important to the nomads of Kazakhstan. These very big Kazakh dogs were as fast as horses and strong enough to kill wolves. But they were loyal, friendly and gentle with children. They protected sheep, goats and cattle at night, and wolves feared them. There are not so many *tobets* in the modern world, but there are many traditional stories about them. Have you heard the story about Tortkoz and Moinak?

One afternoon in summer, two *tobet* dogs, Tortkoz and Moinak, were lying near a house in their village. They had been looking after the goats all morning so they were very tired, but now they were enjoying the warm sun, feeling happy and talking to each other.

They had been talking for nearly an hour, about many things, when finally the conversation turned to friendship. Moinak said, 'Tortkoz. You know, you and I have never talked peacefully like this before. Usually we fight. We fall out for the smallest reasons, and every day there is a new reason and a new fight. Other dogs are friendlier than us – they get on well and they share their food in a friendly way. Are we going to grow old and not be friends? Friendship is a wonderful thing, Tortkoz. Let's be friends. What do you say?'

Tortkoz had often had the same thoughts and he nodded his head. As soon as Moinak finished, he replied, 'Moinak, you're right! I've always thought the same. Why are we so stupid? What's wrong with us? Life is good. We should be friends.'

The two new friends laughed happily. 'We will never again fight for food,' Tortkoz said.

2 Read the text, then underline the correct word or phrase.

- 1 Children / Wolves / Sheep were afraid of *tobets*.

A dangerous sport

This is the story of two ambitious mountain climbers, Joe Simpson and Simon Yates, whose story was later turned into a film, *Touching the Void*, which was extremely successful. Joe and Simon managed to climb the West Face of Siula Grande in the Peruvian Andes.

1 _____ After reaching the top, Joe and Simon decided to go back down via the North Ridge, an extremely risky but faster route. Their climb had already taken much longer than they had intended because of bad weather.

2 _____ So it wasn't possible for them to melt ice and snow for drinking water any more. It was getting dark too, and they knew they needed to descend quickly to the glacier, about 1,000 metres below.

3 _____ Joe slipped and fell, breaking his leg. Both Simon and Joe were in shock. They were at a height of 6,000 metres. 4 _____ They were freezing. They had no

communication with the base camp, and there was no chance of a rescue helicopter or any other form of outside help. The situation was really dangerous, not just for Joe, but for both of them. As an enormous snowstorm was beginning around them, Simon tied two ropes together, tied them around Joe, and started lowering his injured friend. Suddenly, the rope got stuck between two rocks and Joe was left hanging from a cliff, over a huge crevasse.

5 _____ He tried desperately for more than an hour to pull his friend up, but without success. The situation was absolutely hopeless. Simon imagined both himself and his friend dying in the snow and ice. He didn't want to leave his friend alone, but he began to understand that there was no way he could save both his own life and that of his friend.

For a moment, Simon felt like giving up. But then he decided to cut the rope and save his own life. Joe fell away, right down to the bottom of the crevasse. The next day, when Simon continued down the mountain and passed the area where Joe had landed, he saw nothing, and assumed he was dead.

But he wasn't. Joe had survived the fall. 6 _____ For the next three and a half days, he continued to descend the mountain, crawling and hopping on one leg. He even managed to cross a glacier with no safety equipment or ropes. 7 _____ The others were amazed to see him. Joe's incredible determination and the fact that he hadn't given up under the most desperate conditions had helped him to save his own life.

AN ACTIVE LIFE: BEAR GRYLLS

When he was 20, he broke his back in three places in a parachuting accident. He climbed Mount Everest at the age of 23. Soon afterwards, he led a trek across the frozen North Atlantic.

In 2007, he set another world record by flying over Mount Everest in a powered paraglider. This helped to raise one million dollars for the Global Angels Foundation, a charity that supports children in Africa.

His first book, *Facing the Frozen Ocean*, was shortlisted for the UK's 'Sports Book of the Year'. Since then he has written more than 15 books, including the No 1 Bestseller: *Mud, Sweat and Tears*.

His name is Bear Grylls, and he was the host of Discovery Channel's famous TV show, *Man vs Wild*. In the show, he was left in remote locations in order to demonstrate survival techniques. Millions of viewers watched, as he killed the most poisonous snakes and ate them, climbed extremely dangerous cliffs, parachuted from helicopters and balloons, ran through a forest fire, and ate all kinds of insects.

Grylls continues to impress with his amazing shows and incredible charity work. And he has set up his own company, Bear Grylls' Survival Academy, where everyone can learn survival skills from him and his team of highly trained experts.

Recently, Grylls founded Young Survivors – training courses for teenagers, a combination of survival skills and adventure tasks designed to teach the basic rules of outdoor survival and self-rescue. Those who complete the course are given a Young Survivors Award. Techniques taught include how to build and light a fire, how to navigate in both day and night, building a shelter, extreme weather survival, tracking and hunting and tying knots. An important aim of the course is getting young survivors back in touch with nature and away from technology.

In Grylls' own words: 'The thing I love about the Young Survivor Course is that it is designed to put young adults in just the sort of challenging, character-building and practical situations that help define and distinguish people as adults. So often, youngsters can feel almost over-protected and are stopped from experiencing some of the best things in life – but the Young Survivor Award will challenge and empower them in an incredibly dynamic and fun environment.'

Keeping fit and healthy – stories from around the world

Ice swimming

Imagine it's minus 15 degrees Celsius outside on a sunny Saturday afternoon and you are somewhere in Russia, Kazakhstan or Finland. Would you rather see a film with a friend, go for a walk and enjoy the beautiful snow, or go for a swim in the nearby river? Not many of our readers would choose to go for a swim in such low temperatures, but in Russia, Kazakhstan, Finland and other countries, ice swimming has been popular for centuries. Some people say it's very healthy because it improves blood circulation and strengthens the body's immune system. Doctors say these things may be true, but you have to be very brave to try it – and it's only for people who are already fit and healthy!

Running for fun

Running regularly helps you keep fit. That's why millions of people run several days a week and regularly take part in races. Some runners combine the sport with doing something good for others. They collect money for their run and give it to a charity. Some charity runners run a full marathon dressed in a crazy costume to collect more money for their charity.

Travis Snyder from the US had been thinking for some time about an idea for a fun run where professionals and amateurs could run together. In 2012 he organised the first 'Color Run – The happiest 5K on the planet'. What started with 6,000 participants in Phoenix, Arizona, is now held annually

in many cities around the world, with millions of runners. The idea is simple: you start wearing something white, and at every kilometre people spray and paint you in different colours: 1K is yellow, 2K is blue, 3K is green, 4K is pink, ... a 'colour extravaganza!' Why do people go on a Color Run? Because 'it's healthy, fun and colourful' as one runner put it.

A beautiful morning in the park

The scene you can see in this photo is something you will see in many parks in China: big groups of people doing tai chi – slow, controlled movements of the arms and legs. These movements are very good for your health. They help to overcome stress, and people doing tai chi say it helps them to concentrate better and to feel happy and relaxed. On weekdays you will often see elderly people doing tai chi, but at weekends the parks are full of families, including children. They are all practising these elegant movements together.

A big mistake

Last summer I was staying at a holiday camp with some friends. On the last day, we wanted to go up a mountain near the camp. But it was already lunchtime, and it had been raining all morning. So Pete, our guide, said, 'Sorry, guys, the weather is just too bad. We can't go.' We had all been looking forward to this mountain trip for days.

At first, we were really disappointed. Then one of my friends had an idea. 'Why don't we go anyway?' he said. 'Pete won't notice, and we'll be back before it gets dark'. Five minutes later we were ready to leave.

We made good progress. 'We'll be at the top of the mountain in an hour,' we thought. But then the weather changed. It became foggy, and the rain became much stronger. Suddenly, we realised that we had lost our way.

Luckily, I had my mobile phone on me. We phoned Pete at the camp. He told us to stay where we were. When he found us, it was already dark. We were really sorry. We had made a big mistake.

A Stronger Sports Community

Exercise and sports have always played an important role in the everyday life of the Kazakhstani people. Take horseriding, for instance. It's been part of our culture for centuries and we are known around the world for our horseriding skills. We even have our own traditional sports on horseback, such as *baiga* and *tenge alu*. But I'm not writing this blog post so as to write about traditions. There are a number of sports that are becoming more and more popular thanks to our international sportspeople and their achievements.

Boxing has made the Kazakhstani people proud many times. Our boxers' performance is considered one of the best and they have won a lot of medals in international competitions. Serik Sapiev won a gold medal in the 2012 Olympic Games in London, Adilbek Niyazymbetov won a silver medal, Ivan Dychko and Marina Volnova won a bronze medal each – and that was just in one competition! In order to understand how important Kazakhstani women have become in boxing, I'll just say this: the Kazakhstan women's boxing team won six out of ten gold medals at the Nations Cup international tournament in 2018.

One of the most recent sports to become popular in Kazakhstan is speed skating. It's been around in Kazakhstan for more than three decades, but it was in the 2014 Sochi Games when Kazakhstani speed racers made this sport more popular. The national team came fifth in the finals of the 5,000-metre relay. Six speed skaters took part in the 2018 Winter Olympics that were held in South Korea. Although none of them won a medal, they worked hard to prove that Kazakhstan is a team to watch out for in the future – and they succeeded. Yekaterina Aydova took part in three races and her best result was ranking 18th in the 1,500-metre race.

Lastly, I must mention rugby. It may not be as popular as horse riding or boxing, but I think it will become so in the future. 'The Nomads', our national women's rugby team, have won the Asian Championship three times. The men's rugby team is also becoming stronger and so is the sports community in Kazakhstan thanks to all our amazing athletes.

2 Read the blog post again. Answer the questions.

- 1 What's the writer's purpose with this blog post?

- 6 When did people start noticing Kazakhstan's talent in speed skating?

TRAIN TO THINK

Exploring hidden messages

People don't always say what they mean. For example, imagine you show a short story you've written to a friend and ask for their opinion. What do you think when they tell you, 'I thought the beginning was great'? Was the beginning really good or are they trying to hide the fact that they didn't really like the rest of it? People do this for a number of reasons; they don't want to be rude, they're not brave enough to tell the truth or they don't really have an opinion.

1 Look at what these people have said. What do you think they might really be hiding?

- 1 *That's an interesting jumper you're wearing.*
- 2 *There's an earlier train you could catch, if you want.*
- 3 *Joe always has a lot to say for himself.*
- 4 *Your homework reminded me a lot of Simon's.*

EXPLORERS

Almost every country on our planet has been explored and mapped, and all of these have roads, and railways. Communication is being improved every day, with faster and better telephone and internet access around the world. So it can be hard for us to imagine the people who travelled without all of these things.

This series celebrates the men and women who opened the world up and risked their lives to protect the people and environments they discovered. This week, we learn about a man not well known outside his own country and continent – Cândido Rondon.

A friend to native people Cândido Rondon

In 1865, in a small village in the state of Mato Grosso, Brazil, a boy was born. His father was Portuguese, and his mother was a native Brazilian. His origins later played a big part in helping to connect many cultures in very real ways.

When Rondon decided to join the army as an engineer, a road was being built to link Rio de Janeiro to Cuiba, a journey that previously could only be made by boat. At the young age of 25, Rondon helped to build this road.

He later had the enormous task of placing telegraph lines from Brazil to Bolivia and Peru. This was a difficult job through rough and unexplored land, and so it required a skilled engineer. During this job, Rondon came into contact with the Bororo, a tribe he had family connections with, through his mother. Rondon had a friendly and respectful relationship with the Bororo people, and the telegraph lines were completed with their help.

Rondon's next job was to continue the telegraph system from

Mato Grosso to the Amazon. This time he met and made friends with the Nambikwara, who were thought of as a shy but unfriendly tribe. Rondon got to know many tribes during his expeditions, and he was a great friend to them. He was shocked and ashamed to learn about the terrible way that they were often treated by outsiders. He fought hard to protect them and their right to follow their own beliefs, traditions and customs.

However, some people still considered him an outsider. During his expeditions in Amazonia, Rondon was attacked several times, and once he was injured by an arrow. Other members of the expedition wanted to take revenge on the native people who had attacked them, but Rondon said: 'Die if necessary, but never kill.' Years later, Rondon set up Brazil's Indian Protection Service, an agency to protect the needs and support the cultures of native peoples. Rondon's famous words became its motto.

Rondon died in 1958 and is remembered as a hero in Brazil. A state in Brazil (Rondônia) was named after him, as well as the airport in Cuiabá and several roads.

2 Read the situations. What could you say without being too direct?

- 1 You're at your friend's house for dinner. His mum cooks you something you really don't like.
- 2 Your best friend asks you what you think about their new haircut. You think it's awful.
- 3 Your dad is wearing a really ugly jumper.

- 1 Why do you think the places in the article are more accessible now than they were before?
- 2 Can you think of any other relatively undiscovered places on Earth?
- 3 Which of the places in the article would you most / least like to visit? Why?

Our undiscovered world

Over the centuries, we have discovered more and more about our world, and it's easy to think that we now know everything about it. But the world holds many more secrets, secrets that will probably be revealed in the future. Here are just some of them.

Caves

Deep, dark and cold; caves remain one of the least explored places on Earth. The deepest known cave in the world is Voronya Cave in the central Asian country of Georgia, which is so inaccessible and inhospitable that very little is known about it.

The exact number of caves on Earth is not yet known. Caving is a very popular activity in Europe, Australia, and the United States, so most of the caves that we know about are from those parts of the world. However, there are probably thousands of caves in China. Most of these have not been explored.

The Mariana Trench

The deepest and darkest place in the ocean is the 11,000-metre-deep Mariana Trench. Due to freezing temperatures and high water pressure, it is totally impossible for humans to survive in the deep ocean. Although technology has helped us to discover many new varieties of deep-sea creature on the ocean floor, there is a lot that we still do not know. In fact only 2% of the ocean floor has been explored. More is known about our solar system than about our oceans. But of course, as further studies are carried out, more will be understood about life in harsh ocean conditions.

The Amazon rainforest

The Amazon rainforest contains a huge number of species of plants, and over 2,000 known species of birds and mammals live there. However, some parts of the forest are so hard to get to that scientists have not yet explored them. So far, around 2.5 million insect species and 400,000 plant species have been recorded, but some people think that tens of thousands more will be found in the future.

Deserts

Although we know where all the Earth's deserts are, they are among the most unwelcoming environments for human beings, so very few explorations have been carried out. It is almost impossible to survive long periods of time in the desert, so desert explorations often have tragic results – many people have died on these expeditions. It's unclear whether anything interesting will be uncovered if we succeed in exploring the deserts, although there are animal and plant species there which are unusual because they have developed to survive in very high temperatures and with very little water.

- 1 Look at the picture. Do you know what this is?
- 2 Read the article. What animals does it mention?

STOP! BEFORE IT'S TOO LATE

The Himalayas

Why should we care?

The Himalayan mountains in South Central Asia contain many of the world's tallest peaks, including Mount Everest. They also contain the biggest number of glaciers after the North and South poles. Three of the greatest rivers in the world start from these mountains: the Ganges, the Indus and the Yangtze. These rivers provide water to a billion people in Asia.

What's happening?

The biggest danger to the Himalayas is **global warming**, which is melting the glaciers fast. There is also a huge problem with **deforestation** in the mountains. Many species of animals such as the tiger, the rhino and the snow leopard are in danger.

The Amazon

Why should we care?

The Amazon in Brazil is the largest tropical rainforest in the world. It is home to 10% of the world's wildlife. The Amazon River is the largest in the world and contains the most freshwater fish on the planet. It is also home to 350 different **tribes**. But perhaps most importantly, it provides between 25 and 30% of the world's oxygen.

What's happening?

The biggest **threat** is deforestation. This happens to make space for farm land and to have wood. As a result, many animals are **endangered**, among them the golden lion tamarin and the jaguar. Since 1950 we have lost

more than 17% of the Amazon rainforest. We can't afford to lose any more.

The Galapagos Islands

Why should we care?

The Galapagos Islands are one of the most amazing places on Earth. These **tiny** islands are 1,000 km from Ecuador in the Pacific, and contain many species of plants and animals that are found nowhere else in the world, among them the giant tortoise, the Galapagos penguin and the Galapagos sea lion. They are also famous because the scientist Charles Darwin spent time there studying the wildlife.

What's happening?

The Galapagos Islands are very **fragile**. The greatest dangers to them include overfishing, pollution and tourism. There is also a threat of animals from other parts of the world arriving on the islands and killing the local wildlife.

The Great Barrier Reef

Why should we care?

The Great Barrier Reef, off the eastern coast of Australia, is over 2,000 km long. It is the only living **organism** on the planet that you can see from space. It is home to 1,500 different types of fish, 400 different types of coral, 215 different types of birds and six different types of turtle.

What's happening?

We have already lost 10% of all the coral, but scientists **fear** that we will lose 70% more in the next 40 years. The greatest dangers to the reef are pollution and overfishing.

- 4 Choose one of these environmental problems and make notes about what the situation is now, possible consequences and what should be done.**
- a one of the problems mentioned in this unit, for example, deforestation in the Amazon
 - b an environmental issue in your town or country
- 5 Write an article for your school magazine raising awareness about the environmental issue you have chosen.**
- Find a good title.
 - Write an introduction that catches the reader's interest.
 - Describe what the problems are, what you think the consequences might be and what should be done.

The sad story of a once beautiful river

The Quiller River was once so beautiful that there is even a song about it. And now?

The situation is alarming. There are lots of factories along the river. Newspapers have recently reported that the water in the river is totally polluted. There are hardly any fish left, and the water itself smells terrible. The situation will be even worse in a few years unless factories stop polluting the water. So I really think we should do something about it. We need stricter laws to protect our river.

And just look at the river banks. They are covered in litter. It seems that there are lots of people who throw their waste into the river. This must stop! We should all get together and help clean up the river banks.

If we wake up and we all do something, we might once again be able to enjoy the beauty of the river. Let's hope it's not too late.

EXTRA READING

1 **PRE-READING** Where do wild tigers live? Why do you think they are in danger?

Tigers return to Kazakhstan

Tigers can be dangerous, of course. But do we want to live in a world without these beautiful wild animals?

A hundred years ago, there were 100,000 wild tigers living all over Asia. But since then, tigers have disappeared almost everywhere. Only about 3,000 wild tigers remain now in a few parts of Russia, India, China and Southeast Asia. If nothing is done, they will be lost for ever.

This has happened for two reasons. There are more and more people in the world every year. Roads, villages, farms, towns and cities have

been built almost everywhere. So there are fewer wild places and large forests where tigers can live and find food. The other reason is hunting. Tigers have always been killed by hunters and farmers, but in the last 100 years guns have become common. So tigers have been killed more easily.

In Kazakhstan, the last wild tigers were seen in the late 1970s. But now there are plans to bring tigers back. An important international meeting was held in Astana in 2011. It was the meeting of The World Wide Fund for Nature (WWF). Everyone agreed that we must not allow wild tigers to disappear from the world and governments must work together.

The government of Kazakhstan plans to reintroduce tigers in part of the country where they used to live. A protected area for tigers will be created south of Lake Balkhash. The government plans to have tigers flown in from Eastern Russia because Russian Siberian tigers are almost the same as the tigers that used to live in Kazakhstan. The Russian government has promised to help.

The Ili River area south of Lake Balkhash is a large area that is good for tigers. It also has some of the animals that tigers eat – deer, gazelles and wild pigs. So the plan makes good sense.

Other countries in Asia have agreed to protect wild tigers too. All these plans will make a big difference because they will allow tiger numbers to grow naturally. But this won't happen unless everyone helps. If they can all keep their promises, these beautiful animals will not disappear.

2 Read the text. Then mark the sentences T (true), F (false) or DS (doesn't say).

- 1 In the last 100 years, 97% of the world's tiger population has gone.
- 2 Hunters with guns are the biggest problem for tigers.
- 3 There used to be wild tigers in Kazakhstan.
- 4 The government plans to bring tigers to the north of Kazakhstan.
- 5 It will be a few years before the protected area is ready.
- 6 Some other countries have similar plans.

 - b an immigrant living and working in Riace?
- 2 Do you think things will continue to go well in Riace in the future? Why (not)?

Refugees Bring New Life to a Village

Riace is a small village in Calabria, which is a very pretty region of Italy, but also quite a poor one.

Riace once had a population of 3,000, but in the 1990s a shortage of jobs meant that many of the inhabitants, especially young people, left the village to find work in other places. The only school closed. There were no restaurants and very few shops. Many houses were empty. Riace was becoming a ghost town. But these days it's a different story, because of one man whose dreams have turned Riace into a village with a future.

One day in 1998, Domenico Lucano, a teacher from Riace, was driving near the sea when he saw a large group of people on the beach. They were refugees who had arrived by boat to escape problems in their countries. Lucano had an idea of how to help these people and how they, in turn, might possibly help him save his village. He decided to welcome them into the village and to give them food and accommodation in return for work. The refugees also had to learn Italian.

It was the beginning of a plan. Lucano created an organisation called Città Futura, or City of the Future. The idea was simple: Riace desperately needed more inhabitants and there were plenty of people in the world looking for a home. The village began to welcome

refugees from Somalia, Afghanistan, Iraq, Lebanon and other places. Lucano used buildings which had been empty for years to house the new arrivals, and he created workshops for them to work in.

Riace is now home to between two and three hundred immigrants, who live happily alongside the locals. Most of the women make handicrafts to sell in local shops, while the men renovate empty houses to rent to tourists. But it is not only the refugees who have gained from Lucano's plans: Città Futura also has 13 local employees, which makes it the biggest employer in the village. And because of the arrival of more children, the school is open again. Lucano, who became mayor of Riace in 2004, has managed to create jobs and to stop the villagers moving away, while at the same time helping some of the poorest and most desperate people in the world.

Many politicians have visited Riace hoping that they can use Lucano's ideas in their own towns and cities. The German film director Wim Wenders also went there and was inspired to make a short documentary about the village called *Il Volo* (*The Flight*). Lucano himself was voted third in the 2010 'World Mayor' competition, and was praised for his courage and compassion.

Distinguishing fact from opinion

People often have disagreements because they confuse opinions with facts. A fact is something true for which there is usually proof. An opinion is a thought or belief and may not be true. When you want to know if what someone is saying is really true, it's important to ask the right questions to help you separate opinions from facts.

1 Read the two statements (A). What is the purpose of the question (B) that follows each of them?

- 1 A *Teenagers never want to travel anywhere with their parents.*
B Does that mean that there has never been a young person who liked travelling with their parents?
- 2 A *I'm convinced listening to music keeps you healthy.*
B What evidence is there that proves you are right?

2 Here are things people said to Domenico Lucano when he was about to start his project. Work in pairs and find good questions that he could ask to separate opinions from facts.

1 *All the young people are moving away.
Our town has no future.*

2 *I'm sure these refugees are trouble makers.*

3 *Don't invite these people to our village.
They're poor and will only create problems.*

4 *It's a bad idea to put people from different countries together. They might not get on.*

5 *These people can't survive in our village.
There's just no work for them.*

An Ice Cold Summer

In the summer of 2014, a weird and wonderful craze swept across the world. Everywhere you looked people were pouring buckets of freezing water over their heads. The craze soon had a name – ‘The Ice Bucket Challenge’ and the idea behind it was to raise money for charity. Despite the popularity of the challenge, not many people knew where it had come from. In fact it was the idea of an American called Pete Frates. He had been a promising college baseball player who seemed to have a bright future with the Boston Red Sox. However, his career was cut short when he fell ill with a disease called amyotrophic lateral sclerosis (or ALS for short). ALS attacks the nervous system and can cause speech problems and paralysis. Frates wanted to do something to help sufferers of ALS. He had a simple but brilliant idea.

The idea was that you chose a couple of friends and challenged them to pour a bucket of freezing water over their heads. If they did this then they paid \$10 to the charity. If they refused, they paid \$100. To prove they had done it, they had 24 hours to post a video of their challenge online. Then it was their turn to choose two more people and challenge them.

Soon it had gone viral with plenty of celebrities worldwide joining in, including Usain Bolt, Lady Gaga, Oprah Winfrey, Taylor Swift, and Cristiano Ronaldo. The US President Barack Obama and UK Prime Minister David Cameron were also challenged, although they both refused to do it and donated the \$100 instead. More than 2,500,000 videos were posted on Facebook from around 150 different countries. Many millions of pounds were donated to the charity.

However, not everyone viewed the Ice Bucket Challenge positively. Many people felt that it put too much pressure on people who did not want (or maybe could not afford) to support the charity. It was also later found that many people who did the challenge didn’t actually make any donation at all. One study found that even though over 15% of the British population had done the challenge, only 10% of participants had actually given any money to charity. Other people pointed out that water is a valuable human resource that is in short supply for millions of people around the world. They criticised the challenge for wasting water.

So was the Ice Bucket Challenge a good thing or not? That will always depend on who you talk to. Nevertheless, for a few hot months of summer back in 2014 the Ice Bucket Challenge brought millions of people from all over the planet together for a ‘cool’ cause.

Culture

- 1 **SPEAKING** Work in pairs. You find a valuable ring in the street. Think of four things you could do with it.
- 2 Read the story. What did Billy do with the ring?

The day Billy Ray's life changed forever

Billy Ray Harris was homeless. He spent each day on the streets of Kansas City, begging for money for food and maybe a bed for the night. Every day, as he sat thinking about his life, he occasionally heard the sound of a coin or two dropping into his cup. One day, the noise was louder than usual. Billy didn't look up, so he didn't see the young lady on her way to work. A little later, when he looked into the cup, he could hardly believe what he saw. At the bottom was a shining diamond ring.

Billy's first thought was to go straight to a jeweller's and that's exactly what he did. To his complete amazement, he was offered \$4,000. Billy thought long and hard. Was this a mistake? It was more money than he'd seen in a long time. But then he thought about his grandfather, who had brought him up always to do the right thing, and knew he had to reconsider. His mind was made up. He'd keep the ring and maybe one day its owner would return.

In fact, he didn't have to wait long. Two days later, a young woman approached him while he was begging. She introduced herself as Sarah Darling and asked if he'd found anything unusual

in his cup. Billy reached into his pocket and pulled out the ring. When he saw the smile on Sarah's face he knew he'd made the right decision. She explained that when she dropped the coins into his cup, she'd forgotten putting her ring in her purse.

But the story doesn't end there. Sarah told her husband the story and how she wanted to post it on the Internet. He thought it was a good idea. They also set up an online appeal to raise money for Billy. They soon had more than \$185,000.

Billy Ray Harris no longer spends his days begging. He has a home and a job. The story also made the local news and he was reunited with his two sisters, who he hadn't seen for over 16 years. And all this happened because he did the right thing!

- _____, people are starting to ignore these charity emails.
- _____, I still believe that social media can be a really useful way of raising money for charity.
- _____ it's no surprise that more and more people are using social media to raise money for charity.

4 Look at the following essay title and make notes.

Social media brings people together.

Introduction: _____

For: _____

Against: _____

My conclusion: _____

5 Write your essay in 140–190 words.

Social media is the best way of raising money for charity.

- A *Nevertheless, I still believe that social media can be a really useful way of raising money for charity. We just need to be careful how we use it and make sure we don't use it too often.*
- B *When my mother was a child she used to take part in sponsored challenges to raise money. She would knock on people's doors asking them to promise money. Then, when she had completed the task, she had to return to collect the money. These days people use sites such as JustGiving to ask for sponsorship. With one click people can donate immediately. There's no dispute that social media is probably the most efficient way of reaching a lot of people very quickly.*
- C *However, because it has become much easier, more and more people are trying to collect money for charity. As a consequence, people are getting tired of constantly being asked to donate each time they check their email accounts. Furthermore, these requests often come from people we don't really know. They lack the personal touch. As a result, people are starting to ignore these charity emails.*
- D *These days social media is a huge part of almost everyone's life. It's often the quickest and easiest way of keeping in touch with friends or sending your message to a wide audience. Therefore it's no surprise that more and more people are using social media to raise money for charity. But is it always a good idea?*

EXTRA READING

- 1 **PRE-READING** Work in pairs. What experience do you think the writer writes about? Read the article and find out.

The Best Experience Ever

by Andy Baker

When my mum explained that we were going to spend two months in southern Kazakhstan, I wasn't very pleased. I didn't want to go to a small town in a faraway country, away from all my friends. I refused to go with her, but I had no option. The plan was for my mum to volunteer as an English teacher at the local school in Kulan. What was I going to do? I'd help her, play with the children and take part in after-school activities. I could also explore the area and the vast Kazakh steppe in my free time.

My friends encouraged me to take the trip as an opportunity and to learn from the experience. Of course, they were right. As soon as my mum and I arrived in Kulan, people invited us to spend time in their houses, taste their food, and learn about their traditions. They were so friendly and kind to us that I'm glad I agreed to help my mum. The children at the school were very sweet and they demanded that I play games with them every afternoon. It was so much fun and I was too busy to miss home.

For the whole time we were there, my mum and I stayed with a local family. The mother, Assel,

really made us feel at home. She claimed that she was the best cook in town and I would definitely give her my vote. Every day, she prepared wonderful meals for us and she was generous with her recipes. I've got a whole notebook full of them. Her husband, Serik, persuaded me to go horseriding, which I'd never done before. Their older son, Abai, took me to the local boxing gym and I got to learn some moves. That was cool! I even learned some basic Kazakh phrases.

On our last day in Kulan, I was really sad to say goodbye to the little students and all the friends I had made. I told my mum I felt bad for the way I reacted when I first heard about the trip. Now I know that you have to be open for good things to happen in your life. If you get the chance to go on a volunteer program, I recommend that you take the chance without giving it a second thought. No matter where you go, you'll learn a lot about yourself and the world. If it's Kazakhstan, even better because people there are so nice and there's so much to explore. If it's Kulan, drop me a line because I've got lots of tips to give!

2 Read the article again. Answer the questions.

- 1 What was Andy's first reaction to volunteering in Kazakhstan?

3 **SPEAKING** Which types of story do you like reading most?

Everybody loves stories – but why?

What's the first image that comes to mind when you hear the word 'storytelling'? A parent who's reading a fairy tale to their little child – that's what most of us think of immediately. But there's more to stories, of course. What about our favourite movies, the thriller we're reading right now, and that friend who's so brilliant at telling jokes and anecdotes that everyone loves listening to? The movies, the thrillers, the anecdotes and the jokes: they all have something in common with fairy tales. They're all based on the same activity, which is one of the most exciting things humans can do: telling stories!

But why do we tell stories? Just for fun? Well, here's a story for you. Imagine the world hundreds of thousands of years ago. A group of Neanderthals are sitting around the fire in a cave, where they've just finished eating a big meal together. One of them has an idea. He wants to get some berries, which he wants to share with everybody. His friend decides to join him. Off they go, out of the cave, down to the place where the best berries grow. Well, they don't come back for a long while, and finally, the only one of them to return is the friend, who's covered in blood and has a sad story to share. He tells the others that as soon as they went round the bend, not far from the cave, a sabre-toothed tiger attacked them and killed his friend. The others are

shocked, of course, but they're also warned.

Are you getting the idea? Stories aren't just about entertainment. Good stories engage us emotionally, and they do that by giving us something to think about. They contain messages which might be useful for us in the future, like the Neanderthal man's story, which certainly wasn't intended to entertain his friends!

We admire people whose magical storytelling skills capture our attention and our imagination. Everybody has always respected storytellers, who have been important members of many societies. In the past, storytellers often travelled a lot. When they went to places far away, their stories travelled with them. When they returned home, they had new stories to share. People were eager to listen, which was fun but also gave them a chance to learn about those remote places.

In cultures all over the world, important stories have been passed down from generation to generation. These stories come from previous generations, whose wisdom and knowledge they contain. They're often about disasters, dramatic events such as fires, storms, thunder, lightning and floods. Every country and culture has its own stories. Our stories have become part of our tradition. Our stories reflect who we are.

- 1 Imagine you had a machine like the one in the story. If you could eliminate one problem in the world, what would it be? Why?

READING

- 1 Look at the photos. Do you recognise these fairy tales? Do you know their names in English?
- 2 Read the article quickly. Who are the Brothers Grimm?

Hollywood fairy tales

Little Red Riding Hood used to be just a story that parents would read to their children at bedtime, but not any more. In 2011, *Red Riding Hood* became a Hollywood

blockbuster directed by Catherine Hardwicke. Hardwicke directed *Twilight*, which made her the obvious choice for another film so clearly aimed at the teenage market.

Red Riding Hood isn't the only film to have gone back to the classic fairy tales and updated them for today's teenagers. *Hansel and Gretel: Witch Hunters*, *Jack the Giant Slayer* and *Snow White and the Huntsman* have also persuaded many young people to revisit the stories of their childhood. And let's not forget *Brothers Grimm*, starring Matt Damon and Heath Ledger, in which the original authors of many of these fairy tales come face to face with some of their characters. Hollywood, it seems, has realised that fairy tales have the

potential to make money, and lots of it.

Teenagers are one of Hollywood's most important markets and after the success of series like *Harry Potter*, *Twilight* and more recently *The Hunger Games*, film studios are looking for more inspiration for stories to keep young people returning to the cinema. Fairy tales might just be the answer. Many are already quite dark, which makes them ideal for adolescents, who are often fascinated by that side of life. Of course, you might not recognise much of the original story, as extra horror, and romance for the heroes and heroines, have been added to the plots. But with modern-day special effects to bring it all to life, does it really matter?

3 Read the article again and connect the sentences.

GULLIVER'S TRAVELS

(1726) Jonathan Swift

On the fifth of November, which was the beginning of summer in those parts, the sailors **spied** a rock very close to the ship; but the wind was so strong, that we were driven directly upon it, and the ship immediately split. Six of us let down the boat into the sea and then made a shift to get clear of the ship and the rock. I think we rowed about three leagues but then we weren't able to work any longer. We were already very tired. We were, therefore, at the mercy of the waves; and, in about half an hour, the boat was overset by a sudden wind from the north. What became of my companions in the boat, as well as those who escaped on the rock, or were left in the **vessel**, I cannot tell, but I believe they were all lost.

Lemuel Gulliver is a surgeon who works on ships. He has been travelling for six years when he decides to take one last job before going home. His last ship is the *Antelope* and they are in the East Indies when a violent storm comes.

As for me, I swam as fortune directed me, and was pushed forward by the wind and the sea. I often let my legs drop, and could feel no bottom; but, when I was almost gone, and unable to **struggle** any longer, I found myself within my depth; and, by this time, the storm was a lot weaker.

It was so shallow that I walked about a mile before I got to the shore, which I guess was about eight o'clock in the evening. I then moved forward about half a mile, but could not discover any sign of houses or people; or I was so weak that I did not notice them. I was extremely tired and with the heat of the weather, I found myself much **inclined** to sleep. I lay down on the grass, where I slept more deeply and peacefully than ever before. I **reckoned** I slept about nine hours, because when I woke up it was just daylight. I tried to get up but I

couldn't move: because as I **happened to** lie on my back, I found my legs and arms were strongly fastened to the ground; and my thick, long hair was tied down in the same **manner**. I could only look upwards, the sun began to grow hot, and the light offended my eyes.

Suddenly I heard a strange noise; but, in the **posture** I was in, I could see nothing except the sky. A little later, I felt something alive moving on my left leg, which, moving gently forward over my breast, came almost up to my chin; I looked down and I **perceived** it to be a human creature, not six inches high, with a bow and arrow in his hands. In the meantime I felt at least forty more of these creatures were following the first.

I was in great **astonishment**, and shouted so loud that they all ran back with fear; and some of them were hurt with falls they got by jumping from my sides upon the ground. However, they soon returned, and one of them, who was brave enough to get a full sight of my face, lifting up his hands and eyes in admiration, cried out in a shrill, but distinct voice – *Hekinah degul!* The other repeated the same words several times, but I didn't know then what they meant.

3 Match the words in bold to the definitions to form a glossary.

Ireland

A nation of storytellers

Hardly any country can claim to have a richer storytelling tradition than Ireland. This is the result of a mixture of many people – the Celts, the Vikings, the Normans and the English – who came to the island at various times and all left a bit of their culture behind.

In the Celtic tradition of spoken storytelling, singers and poets called bards were extremely important people. There was no written language tradition in those days, so bards had to memorise the stories, poems and songs to be able to perform them live. Good storytellers **knew** hundreds of stories **by heart**. The stories were the only **record** of important events, and people **appreciated** them: they were the best entertainment available.

This tradition has been influential for more than 2,000 years and, in many ways, it's still alive today. Stories have been **handed down** from generation to generation, with very little change. Storytellers used to move from village to village. Wherever they appeared, they were warmly welcomed, and people gave them food and **shelter** for the night.

The Irish love of stories can be felt all over the country. In many places, older

people still remember the *céilí* (pronounced 'kaylee' and meaning 'get-together'), in which people would meet in a house, sit near the fire, tell stories, sing songs, dance and play music. Interestingly, in recent years, there have been successful attempts to **revive** this tradition, and some of the most popular contemporary storytellers are very young.

The elegant way talented storytellers use language is called 'the gift of the gab'. If you want to get the gift of the gab, you have to go to Blarney Castle in Cork, in the south of the island. You have to climb to the top of the castle, lie down and **bend over** backwards to kiss the Stone of Eloquence. And, of course, there's a story to explain this. It tells of an Irish King who rescued a woman when she fell into a river. The woman was so grateful that she **cast a spell** over him. She gave him the ability to speak so well that he could persuade people to do whatever he wanted. But, for the spell to work, he had to kiss a particular stone on top of Blarney Castle. This is what he did, and it worked. So whoever kisses the Blarney Stone will get the same gift.

You don't believe in such stories? Well, it's true, and you can easily prove it. Just climb to the top of Blarney Castle and kiss that stone ...

ANNIE They were playing the song that I'd been singing all day!

MAC So you'd just been singing a pop song that you'd forgotten the name of.

ANNIE Yes, but the strange thing is that it wasn't a pop song from now. It was some obscure song from the 1980s that you never hear any more. It was a song that my dad used to play when I was really small. I hadn't heard it for years. And they were playing it on the radio! 5 _____

MAC Yes, that is pretty weird.

EXTRA READING

1 PRE-READING What and where is Burabay? What and where is Zheke Batyr?

Zheke Batyr's search for happiness

In the north of Kazakhstan, between the cities of Astana and Kokshetau, there is a national park which is called Burabay or Borovoye. It is a beautiful area of lakes and mountains. The highest mountain is Kokshetau (Blue Mountain, 970 metres). To the south is a mountain called Zheke Batyr (The Lonely Warrior, 820 metres).

In the past, people made up stories about the lakes and mountains here. Older people used to pass the stories to young people by word of mouth. The famous Kazakh traveller and scholar, Shokan Ualikhanov (1835–65), was afraid these stories would be forgotten in the modern world. So he collected them and wrote them down.

One story is about how the mountain Zheke Batyr was made. The story tells of a lonely warrior (*batyr*) and his search for happiness. This young man was very strong and he protected his village from enemies. Although his village was poor, he was happy and loved singing songs. But as he grew older, he saw that everyone around him was poor and unhappy. There was too much fighting. Kazakhs were fighting against enemies, but they were also fighting against each other. They had fought about women, about land and about many small and unimportant things.

The warrior decided to leave his village to find happiness and wealth. He planned to return

with gifts for his family and friends. He hoped his gifts would make them calmer, stronger and happier. So he took his sword and rode away on his horse to look for happiness.

On the way, he met some other men from distant places. They had been all searching for happiness too. One of the men said they should all search together. He said, 'The road is difficult and you need friends who will help you.' But each man thought only about himself and his own happiness. So they all went different ways alone.

After that, the strong young Kazakh warrior met enemies and faced difficulties. After many fights and many difficulties, he was exhausted. Finally, he understood that nobody can find happiness alone.

In the end, his enemies were too many. He was fighting in a long battle, when suddenly he fell. And in the place where he fell, there is a mountain now. It looks like a sleeping soldier – the mountain of Zheke Batyr, the lonely warrior.

2 Read the text and answer the questions.

- 1 Do we know who made up the story of Zheke Batyr?
- 2 Why did Ualikhanov write it down?
- 3 Who were the people in the village fighting against?
- 4 What did the warrior look for?
- 5 Why didn't he agree to the man's suggestion?
- 6 What did he learn before he died?

A new family tradition

If you think you have the world's most embarrassing dad, then think again.

American teenager Rain Price has just spent the last half year with his dad waving him off to school from the bus stop outside his house. OK, so that doesn't sound too bad, but this was no ordinary goodbye because each day Rain's dad said goodbye wearing a different fancy-dress costume!

It all started on 16-year-old Rain's first day at high school. Like many proud parents, Rochelle and Dale, Rain's mum and dad, sent him off to school with a big wave from the doorstep. That evening Rain made the mistake of complaining about how embarrassing they were, which gave Dale a great idea.

The next morning as Rain stepped onto the bus outside his house, he could hear all of his school friends laughing at something. He turned around and to his horror, there was his dad waving him off, dressed as an American football player, complete with football top and helmet. But that was just the beginning. For the next 180 school days, Dale waved goodbye to his son dressed in a different costume. One day he was a king waving his sword and shield, the next a chef in his hat and apron. Dale even got other members of the family involved, using Rain's younger brother to play Batman alongside his Robin.

Amazingly Dale only spent \$50 on all of his costumes. He got loads of costumes from the family fancy-dress collection and then there were several friends and neighbours happy to help.

Some of Rain's friends didn't find it funny but most of them looked forward to seeing what Dale would be wearing. And Dale also found an international audience for his dressing up too, as each day Rochelle took a photo of her husband in fancy dress and put it on their blog, waveatthebus.blogspot.com, which became a hit on the Internet. Even Rain was eventually able to see the funny side and realised that his dad was pretty cool after all.

But all good things must come to an end and for the final farewell on the last day of school, Dale dressed up as a pirate and stood next to a sign reading 'It's been fun waving at the bus. Have a great summer'. He has no plans to make it a permanent tradition. Instead, he's looking forward to getting a little more sleep each morning.

TRAIN TO THINK

Changing your opinions

It can be a mistake to believe something just because it's based on an opinion you've formed. Becoming a critical thinker means continually reflecting on our opinions, and keeping them only if they are based on evidence that is true.

1 Which people from the story may have had the following opinions at some point? Write their names.

- | | |
|--|---|
| 1 'My dad is the most embarrassing person in the world.' _____ | 3 'I don't think Dale should do this; it's going to cost a lot of money.' _____ |
| 2 'Rain's dad is really silly.' _____ | |

2 **SPEAKING** Discuss how the people's opinions in Exercise 1 have changed and why.

Initially, Rain thought that his dad was the most embarrassing dad in the world. But with time, he realised that maybe that wasn't true. He learnt to appreciate his dad's sense of humour.

3 **SPEAKING** Think of opinions that you or family members have had and that have changed. Think about music, school, fashion, friends, etc. Discuss in groups.

- There were _____ friends and neighbours happy to help.

THINK VALUES

Speaking different languages

1 Tick the statements that reflect how you feel. You can tick as many as you like.

- A good reason to teach children more than one language is to help them to ...
- be able to communicate when travelling;
 - learn about another culture;
 - improve their job prospects;
 - be able to talk to foreigners in their country;
 - be able to read books, magazines and newspapers in another language;
 - develop themselves personally.

2 **SPEAKING** Work in a group of six to eight. Find out from the other students which statements they ticked. Did anyone tick the same statements as you?

3 Make a graph or chart to show how your group feels.

READING

1 Look at the book cover. What kind of book do you think it is? Read the introduction to find out.

Many people wonder how Chinese parents bring up such successful children. They wonder what Chinese parents do to produce so many mathematical and musical geniuses, what it's like inside the family, and if they could do it too. Well, Amy Chua can tell them, because she's done it.

Her daughters, Sophia and Louisa were polite, intelligent and helpful.

They were two years ahead of their classmates in Maths and had amazing musical abilities. But Sophia and Louisa weren't allowed to spend a night at a friend's house, be in a school play, choose what they wanted to do after school, or get any grade lower than an A.

In *Battle Hymn of the Tiger Mother*, Amy Chua tells of her experiences bringing up her children the 'Chinese way'. It is a story about a mother and two daughters and two very different cultures. Funny, entertaining and provocative, this is an important book that will change your ideas about parenting forever.

- 2 Read these two opinions from readers of Amy Chua's book. Which one is 'for' and which one is 'against' the Tiger mum style of parenting? What reasons do they give?

For and against – Tiger Mums

This is an interesting book but Amy Chua's parenting ideas are too strict for me. For example, Tiger mums don't let their children watch any TV or play any computer games. How can any child in the 21st century grow up without playing on a computer? What is she trying to do? Take away their childhoods?

I do understand that she feels she was only doing the best for her children and trying to help them get ahead in life. But there are loads of children who spend hours in front of the TV and still do well.

Stephanie, 15

I think Amy Chua's ideas are fantastic. Yes, she was hard on her children at times but she did bring up two amazing children. Her daughters are so confident, they'll do really well in life.

Too many parents are soft on their children these days. They use the TV as a way of keeping them quiet. They don't have enough time for their children. My mum and dad are strict and they don't let me do a lot of things my friends do. It is hard at times, but they are always there when I need help with my school work or have a problem with other students at school. They are just trying to do their best for me.

Tim, 16

- 3 Read the texts again. Who might say these things? Write Amy, Stephanie or Tim.

- 1 I talk about my problems with my parents.
- 2 No, you can't sleep at Chloe's house.
- 3 Children need to be free to make some of their own decisions.
- 4 My parents don't let me watch much TV, but that's OK.
- 5 You'll thank me one day.
- 6 You can't make children be what you want them to be.

SPEAKING

Work in pairs and answer the questions.

- 1 Who do you agree with most, Tim or Stephanie? Why?
- 2 Can you think of any other examples of rules that strict parents have?

*She doesn't want to go to the party. She **does** want to go – she's just shy.*

Nomadic People: Traditions and languages

Most of us are used to living in the same place – every day, all year round, we go ‘home’. But for some people around the world, home is a place that moves. Here are three groups of people who have a nomadic way of life.

1 The Tuareg

In the central part of northern Africa, which is mostly desert, you can find the Tuareg people, who call themselves ‘Imohag’, meaning ‘free people’. Most of the Tuareg people are found in Mali, Niger and Algeria, although some can also be found in Libya and Burkina Faso. However, being nomadic people, they regularly cross **national borders**.

They have their own language (Tuareg), which is spoken by around 1.2 million people, but many Tuareg people also speak Arabic and/or French. The Tuareg people are mostly Muslim, although some traditional beliefs **remain** from before the arrival of Islam.

In the past, the Tuareg people moved around the desert areas with their cattle, mainly between places where water could be found. Due to the formation of new countries and stricter borders, severe **droughts** and

urbanisation, nomadic life became more difficult in the 20th century. This led many Tuareg people to settle in towns and cities.

Sometimes the Tuareg people are called ‘the blue people of the Sahara’, because of the blue turbans that the men wear, which often gives their skin a blue colour.

2 The Shahsavan

This tribe lives in an area of northwest Iran and eastern Azerbaijan. There are approximately 100,000 of them. In the spring, the Shahsavan move from their winter home in Azerbaijan to their camps near Mount Sabalan, about 200 kilometres south, for the summer. Their journey usually takes around three or four weeks. Each day, they travel from midnight to midday, when the heat begins to prevent further travel. Traditionally, the women and children travelled on camels, and the men rode horses or walked, but increasingly the Shahsavan are using lorries and tractors.

When they reach their **destination**, everyone (including children) helps to set up the main camp, consisting of various types of tent. They stay there until September, when the return journey begins.

Many of the Shahsavan believe that their way of life is dying out, that their grandchildren will not do the **annual** migration any more.

3 Aborigines

The Aboriginal people of Australia have been living there for 40,000 years, since long before Europeans arrived. But they are not one single group – for example, there are over 200 different languages spoken by the Aborigines.

The Aborigines are hunters and gatherers, almost always on the move. **Principally** it is the women who gather food and care for children, while the men are the hunters. They have very few **possessions**, and the ones they

have are mostly light, since they need to keep moving in search of food and to maintain a **balanced diet** (they eat seeds, fruit and vegetables, as well as small animals, snakes and insects).

However, they occasionally decide to settle somewhere and form villages.

3 According to the article, which group (or groups):

- | | |
|----------------------------------|---|
| 1 only travels twice a year? | 4 sometimes lives together in villages? |
| 2 doesn't own many things? | 5 moves from one country to another? |
| 3 speaks more than one language? | 6 has seen their lifestyle change? |

4 **VOCABULARY** Match the **highlighted** words in the article to the definitions.

- 1 the places where one country ends and another begins
- 2 on a journey or trip, the place you want to get to
- 3 all the things that you eat
- 4 times when it doesn't rain and there is little or no water
- 5 mainly
- 6 things that people have and keep
- 7 that happens once every year
- 8 stay, continue

SPEAKING

Work with a partner. Discuss the following questions.

- 1 Do you know of any other groups of people who are nomadic? What do you know about their culture and language?
- 2 What do you think might be the advantages and disadvantages of a nomadic lifestyle?
- 3 The article says that many of the Shahsavans believe that their grandchildren won't live in the same way. Why do you think that might be?

WRITING

An informal email

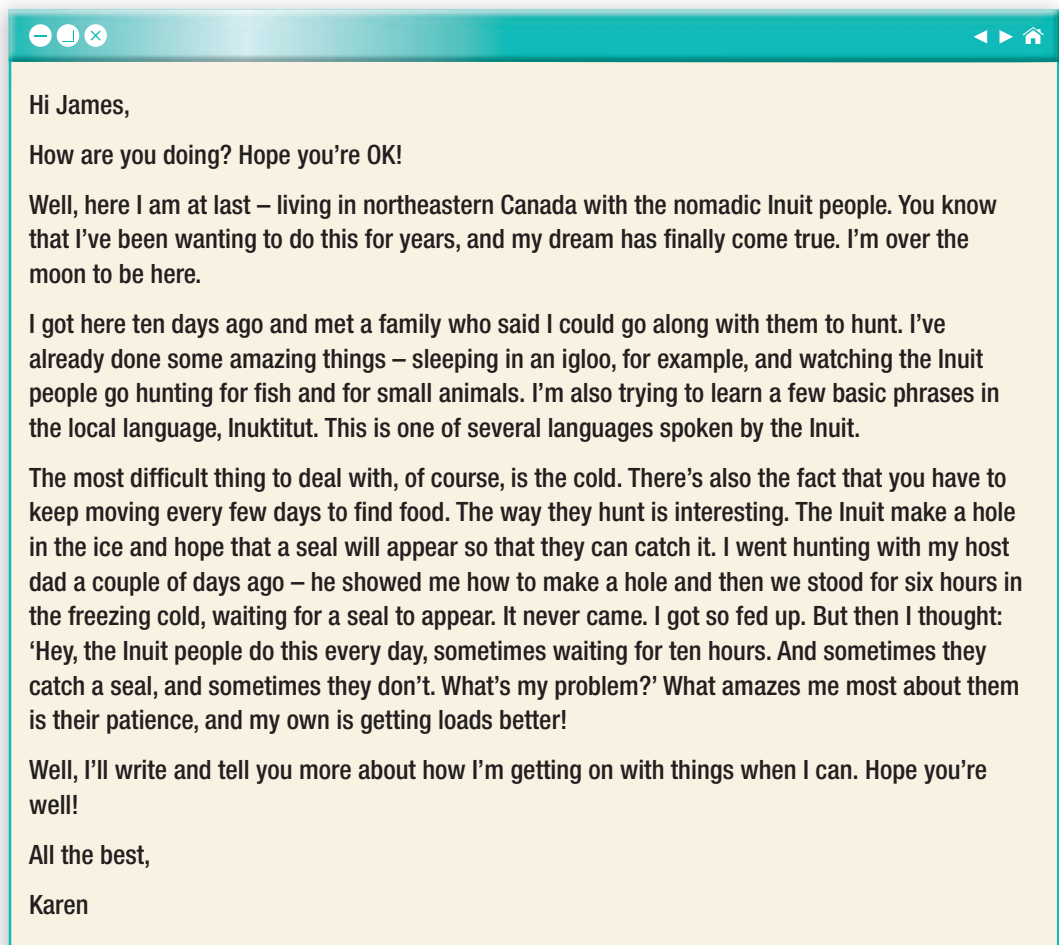

1 Read Karen's email and answer the questions.

- 1 How long has she been with the Inuit people?
- 2 When did she try to catch a seal?
- 3 What does she say strikes her most about the Inuit?

2 Which word or phrase in the email means:

- 1 a great deal
- 2 I have finally arrived
- 3 agreed that I could accompany them
- 4 I am extremely happy
- 5 my experiences here
- 6 one or two days ago

3 Why does Karen not use the expressions in Exercise 2 in her email?

Hi James,

How are you doing? Hope you're OK!

Well, here I am at last – living in northeastern Canada with the nomadic Inuit people. You know that I've been wanting to do this for years, and my dream has finally come true. I'm over the moon to be here.

I got here ten days ago and met a family who said I could go along with them to hunt. I've already done some amazing things – sleeping in an igloo, for example, and watching the Inuit people go hunting for fish and for small animals. I'm also trying to learn a few basic phrases in the local language, Inuktitut. This is one of several languages spoken by the Inuit.

The most difficult thing to deal with, of course, is the cold. There's also the fact that you have to keep moving every few days to find food. The way they hunt is interesting. The Inuit make a hole in the ice and hope that a seal will appear so that they can catch it. I went hunting with my host dad a couple of days ago – he showed me how to make a hole and then we stood for six hours in the freezing cold, waiting for a seal to appear. It never came. I got so fed up. But then I thought: 'Hey, the Inuit people do this every day, sometimes waiting for ten hours. And sometimes they catch a seal, and sometimes they don't. What's my problem?' What amazes me most about them is their patience, and my own is getting loads better!

Well, I'll write and tell you more about how I'm getting on with things when I can. Hope you're well!

All the best,

Karen

4 Imagine you are spending two weeks living with one of the nomadic tribes mentioned in the article.

- Choose which of the three groups you are living with.
- Decide what things in general have been good / not so good about your experiences so far.
- Decide on one specific thing about their life that has really impressed you.

5 You're going to write an email to an English-speaking friend.

- Make sure to start and end your email appropriately.
- Talk generally about your experiences first. Then move on to more specific details.
- Write 150–200 words.
- Check your writing to make sure that your language is not formal.

About: Celebrating languages

Hi Jenny,

Today we're celebrating the Day of Languages in Kazakhstan. It's a day to celebrate all the languages that different groups of people speak in our country. Do you know how many national languages we have? Well, our official language is Kazakh, but people also speak Uzbek, Kyrgyz, Ukrainian, Uyгур, Korean, etc. Depending where you go to school, you learn Kazakh, Russian and probably another language. I love languages, because they allow me to make friends anywhere. Like you! 😊 But I'm sure they will also help me in my studies and professional life. I wonder what you think about this. How many languages do you learn at school?

So would you like to know what we did today at school to celebrate the Day of Languages? First of all, we had a special lesson for our last session. Two students talked to us about the origin of some languages in our country and also taught us a few words and phrases. That was fun! We also had a group discussion about why it's important to try and keep these languages alive. Korean, for example, has fewer speakers today than some years ago. So,

we worked in groups and came up with ideas on how we could 'save' this language. Then we had a language contest about Russian writers, history and culture. At the end of the day, when we usually go home, we all went to the school playground for an hour to watch a play. Our language teachers and a group of students put on a show in Kazakh, which was really good. Every student represented a different language. I think they practised a lot for this play.

But the Day of Languages isn't over yet. Our language teacher told us we had to write a short essay by Friday. She asked us if there are similar celebrations in other countries. So I thought I could ask you. You're from the USA so can you tell me what languages people speak in your country? Do children speak English only or are there other languages they learn at school and at home? Our teacher asked us what other people do to celebrate languages. So, do you have a special day when you celebrate languages like we do? If you can send me your answers by Wednesday, that'd be great! I need a day or two to write the essay! 😊 Thank you.

Bye for now!

2 Look at the sentences and questions in 1 again. Complete the rule.

RULE: We use indirect questions to report what someone asked us. We use *if/whether* when the direct question is a *yes/no* question. To report *wh-* questions, we use the same *wh-* question word.

We use embedded questions to sound ¹ *less / more* polite with phrases like *Do you know ... Can you tell me ... I wonder ... I'd like to know ...*, etc.

In indirect and embedded questions, we ² *use / don't use* auxiliary verbs like *do* or *did*. The verb comes ³ *before / after* the subject like in affirmative sentences.

3 Read the indirect and embedded questions and cross out the extra word.

- 1 The tourists asked me if where the bus station was in English.

- 3 I wonder whether do you speak two languages in this region.

Singer songwriter: Any advice?

Hello. I'm a singer songwriter. I'm *good* and I'm going to make it big! Any advice????

Paulie asked 2 days ago **Answers (3)**

Answer #1 answered 4 hours ago

You could try going onto a show like *The X Factor* or *The Voice*. If you're as good as you say, then these TV talent shows will give you a chance. Of course, the competition will be really strong, and there can only be one winner. If you win it, you should have at least one hit album, but it's no guarantee that you will be successful for a long time. *The X Factor*'s 2007 winner, Leona Lewis, has certainly become a big star, but who remembers the winner of the first series, Steve Brookstein? Maybe it's better not to win at all. In 2009 Olly Murs came second to Joe McElderry and is now much more famous. In 2010 One Direction came third, and the radio hasn't stopped playing them ever since.

Answer #2 answered 10 hours ago

Bands have been using the Internet for publicity for years now. And it has paid off so far because it's cheap, quick and easy. Look at Justin Bieber. In 2007, when he was just 12, he entered

a local singing competition and came second. His mum filmed him and put it on YouTube. Then she put on some more videos of him singing. In 2008 a talent scout called Scooter Braun accidentally clicked on one of Justin's videos. He really liked what he saw and went to meet the young Bieber. The rest is history. And then there's Lily Allen. She had a contract with a music label, but they were too busy with bigger artists to give her any attention. So she posted some of her music on MySpace. Soon, she had tens of thousands of fans, and lots of attention from her label. Thanks to the Internet, she became a star overnight.

Answer #3 answered 2 days ago

I've been writing songs all my life. I never really thought about making a record, but when I was a teenager and I started my band I also started to get more serious about my music. We haven't been playing together very long, but people say we're really good. Now I'm really keen on making a career in music. I think the best advice is to start small and grow big. We've been doing a lot of busking in the streets lately and that's helped us get a good local following. We're now getting invitations from clubs in the area to come and play shows. Loads of famous people started out busking. Eric Clapton, one of the greatest guitarists in the world, busked on the streets of London when he was young.

- 2 The Earth is a mess _____ mankind's greed.

- 4 One of the rocket's oxygen tanks explodes and _____ the three-man crew have to fight against all the odds to bring their spaceship home.

My all-time favourite films about space

Well it's not every day you get a full lunar eclipse. So, to get you in the mood for tomorrow's astrological event, I'm suggesting a few of my all-time favourite films about space. Believe me, they don't get any better than this.

Apollo 13 (1995)

When Tom Hanks announces 'Houston, we have a problem' you know you're in for a **thrilling** journey. This film is based on the true story of the Apollo 13 mission to the moon which very nearly ended in disaster. One of the rocket's oxygen tanks explodes and consequently the three-man crew have to fight to bring their spaceship home. Of course we know they make it but that doesn't make it any less exciting to watch. It gets a little **sentimental** at the end, but after what they've been through, they deserve a few tears of joy.

WALL-E (2008)

Only Disney could produce a film about environmental destruction that manages to be light-hearted and fun. When the film starts, the Earth is a mess as a result of mankind's greed and the last humans have escaped in a giant spaceship into outer space. They've left behind an army of robots to clean away the rubbish in the hope that one day humans can return. WALL-E is one of these robots but his daily routine is interrupted by the arrival of EVE, a robot sent to see what progress has been made. WALL-E falls in love, but will EVE return his love and between them, can they offer hope for the human race? Of course, this **delightful** and entertaining animated film is aimed at kids but it can be equally enjoyed by adults.

Avatar (2009)

When it comes to **action-packed** blockbusters, James Cameron's films are masterpieces, and the sci-fi thriller **Avatar** is no exception. Forget little green aliens, Cameron's aliens are blue and super cool. Mankind has invaded the planet Pandora because of its natural resources, and Pandora's (alien) inhabitants are fighting back. It gets a little **far-fetched** at times, but Cameron's Pandora is **breathtaking** and the eco-message is a reminder to all of us of how important it is that we take care of our own planet.

The Martian (2015)

I've saved the best till last. Matt Damon plays astronaut Mark Watney, who is part of a space mission to explore Mars. He gets caught up in a huge storm and the rest of his crew, deciding that he must be dead, return home without him. Watney must now somehow survive and try to find a way of making contact with his base back on Earth. Two things make this a brilliant film: its **stunning** special effects and Damon's **memorable** performance.

RULE: We use linkers such as *due to*, *as a result of*, *because of* and *consequently* to link actions and their consequences.

Due to, *as a result of* and ¹_____ can come at the beginning of a sentence or in the middle between the two clauses. They are followed by the reason for an action or event.

These linkers are usually followed by a noun phrase. *Due to* and *as a result of* are more formal than *because of*.

²_____ generally comes at the beginning of a new sentence or clause. It introduces the effect of the cause mentioned in the previous sentence. It is followed by a clause (subject and verb).

2 Complete the second sentence so that it has a similar meaning to the first sentence, using the word in brackets. You must use between two and five words including the word given.

0 Olivia didn't have time to study for the test. Consequently, she didn't do very well. (because)

Because of a lack of time to study, Olivia didn't do well in the test.

When Pictures Learnt to Walk and Talk: The History of Film

Early days: the magic lantern

Since its early days, the evolution of film has been influenced by the development of science.

Several scientists in the 18th century developed devices that used hand-drawn pictures on a reflecting surface, a candle and a simple lens to project images onto a wall. These devices are known

as 'magic lanterns'.

More than a hundred years later, in 1798, Etienne Gaspar Robert gave lantern presentations in Paris. His audience sat on one side of a transparent screen while he sat on the other with his magic lantern. He scared his enthusiastic audiences with images of

witches, ghosts and other spooky creatures. In many ways, his shows were the forerunner of modern horror films.

The invention of film

The late 19th century saw the development of reel film. At first it was made of paper and then, later, of a scientific invention called celluloid. In the USA, Thomas Edison and William Dickenson invented a camera that took a picture of a moving object every half second. The pictures were then transferred onto film and were watched through a machine called the kinetoscope. The film could only be watched by one person at a time, looking through a small window to see the moving images.

The next step in the evolution of film was when brothers Auguste and Louis Lumière developed the cinematographe, which made it possible to take moving pictures and project large images. This used the same lens technology as the magic lantern. They started producing short films that were all around 50 seconds long. The most famous one was *The*

Arrival of a Train at La Ciotat Station. When the film was shown for the first time, the audience was so **startled** by the huge image of the train coming towards them that they started to scream and run away.

Hollywood

The 1920s were the most important years for the development of modern film. In that period, film studios came into existence and 'stars' were born. The film industry began to **flourish**, and Hollywood became the world's number one place for film production: over 800 films were made there each year.

The 1930s are often called the Golden Era of Hollywood, with the development of the first talking pictures or 'talkies' (up to then all films had been silent). The film studios also began to produce documentaries and Western films.

These days, of course, modern cinema audiences are used to computer generated imagery (CGI), which brings fantastical worlds and creatures onto the screen in stunning 3D. It's sometimes difficult to see how it can be improved on. But as science and technology continue to develop, we can assume that our cinematic experience will continue to get better and better.

4 Answer the questions.

- 1 What did the first magic lanterns consist of?
- 2 How did Etienne Gaspar Robert scare his audiences?
- 3 What was the limitation of the kinoscope?
- 4 How did the Lumière brothers impress their spectators?

Home (2015)

This animated alien blockbuster features the vocal talents of *Big Bang Theory*'s Jim Parsons (aka Sheldon), singer Rihanna and comedian Steve Martin.

When the Boov race of aliens from outer space discover Planet Earth they think they've found the perfect home. Having relocated all humans to Australia, the Boov settle on Earth, safe from their enemies the Gorg. That is until one of them, the delightful but unfortunate Oh, accidentally sends out a house-warming party invitation, including the location, across the universe. It won't be long until the Gorg are with them, making Oh the most unpopular Boov on the planet. Can Oh, with the help of Tip, the last free human on Earth, save the planet?

Although clearly aimed at the younger end of the market, *Home* has plenty in it to appeal

to parents and older brothers and sisters, making it an enjoyable 90 minutes for all the family. The story, while not the most memorable, is good enough to keep you watching and there are plenty of hilarious moments. Parsons and Rihanna will help the film appeal to teenagers, while Martin will keep parents happy. The perfect film for a rainy day this holiday.

My dream job – Kazakh movie action hero!

Kazakhstan's film industry is going from strength to strength, with our directors working on Hollywood blockbusters as well as films set here in Kazakhstan. But what does it take to land a job in films?

I've always loved films, and recently I've been thinking that I'd like to work in films when I leave school. Not as an actor, though. I've always enjoyed sport, and I'm a bit of a daredevil, so my ideal job would be ... a stuntman! But how do you prepare for this? If only I knew where to start.

I've been doing some research and found out that there are people working as stuntmen and stuntwomen in Kazakhstan. The stunt troupe Nomad was founded in 2003 by Zhaidarbek Kunguzhinov. Originally a circus troupe, the group has evolved into an internationally recognised stunt troupe with a great reputation for horse riding and traditional fighting skills.

They've worked with Hollywood stars such as Bruce Willis and Chuck Norris. They also played a key role in the 2011 Kazakhstan epic film Zhauzhurek Myn Bala. However, it's demanding work: 'To be part of our team, you have to be mentally strong, as working on film sets is tougher than being in the army! There's a lot of pressure. This is why we only take kids over 18 years old ... who constantly work on themselves and perfect their skills,' says Kunguzhinov. The men and women of the troupe train full time, five days a week. An important part of their work is training horses for stunts or horseback fighting scenes. I like horses, but I wish I could ride

better. I think if I started training now, I would have a chance by the time I'm 18.

My parents aren't sure this is a great career choice and I wish they would show a bit more support. But I think in time they will understand that I'm determined to make my dream come true. So I've asked my parents if I could spend the holidays with my relatives in the mountains and they said yes. My cousin's a brilliant horsewoman and she often enters local competitions. I'm sure I will learn a lot from her. If I could take part in some horse games, it'd be a lot of fun! I also ought to carry on learning tae kwon do – if I had a black belt, I'd be able to do martial arts stunts. And of course I'll also work hard on my English – I might find myself on a film set with a Hollywood A-list star one day!

8 TRAVEL AND TOURISM

OBJECTIVES

FUNCTIONS: using intensifying comparatives; expressing regret
GRAMMAR: comparatives (review); third conditional; *I wish / if only* + past perfect
VOCABULARY: ways of speaking; phrasal verbs (2)

READING

- 1 **SPEAKING** Work in pairs. Look at the photos. Describe the situations and how the people might be feeling, using these adjectives.

packed | stuffy | impatient
dull | polite | excited

The train is packed and some people haven't got anywhere to sit.

- 2 **SPEAKING** Choose one of the people and imagine their thoughts. Make notes. Tell your partner the person's thoughts for your partner to guess who it is.
- 3 Look at the title. What do you think happened? Why did people start talking and why might the writer have thought this was a good thing? Read the blog to check your ideas.
- 4 Read the blog again. Answer the questions.
- 1 How long, usually, is the writer's train journey?
 - 2 After the second announcement, what was the first thing people started to talk about?
 - 3 What did the writer find out about other people?
 - 4 In what way(s) did people help each other?
 - 5 Why was the nurse 'welcomed as a hero'?
 - 6 What did people do when the train started moving?
 - 7 What was the train journey like the next day?

- 5 **SPEAKING** Work in pairs and discuss the questions.

- 1 Would this be different if it happened in your country, do you think? If so, how?
- 2 What other situations can you think of in which strangers might start talking to each other?

- 3 Can you remember a time when you started a conversation with someone you didn't know and realised that your first impressions were wrong?

Stuck in a lift

ROLE PLAY Work in groups of four. Students A and C: Go to page 195. Students B and D: go to page 196.

Imagine you are four strangers travelling together in a lift. Suddenly the lift breaks down. An engineer has been called but won't be there for half an hour. Agree together on what you should do.

The day people started TALKING

My journey home from school is nothing special. The train's always busy but I usually find a seat and start reading or texting my friends, making sure, like everyone else, not to look at other people. Then, twenty minutes later, I get off.

But last Tuesday was different. I was happily looking out of the window listening to some new music I'd downloaded that morning when the train suddenly stopped. This wasn't unusual and I didn't think anything of it. Then after about five minutes, I noticed people were starting to get a bit annoyed. They were looking around, wondering what the problem was. Fifteen minutes later, people started getting more and more annoyed – the train still hadn't moved. The longer the train stood still, the more annoyed people became until finally the announcement came: 'We are

sorry to announce that this train is delayed.'

That seemed to calm people down and so we all went back to what we were doing before, but soon there was another announcement: we were going to be there for a long time – a train had broken down in front of us. There was a loud groan throughout the carriage but then something unexpected happened: complete strangers started talking to each other. At first, everyone just complained about the trains, but then people started talking about real things. I started chatting to a couple of young tourists sitting opposite me. They were from Spain and they were travelling around the UK so I suggested some places they could visit. They said they were having an amazing time here. Next, I really surprised myself by starting a conversation

with a businesswoman. It turned out that there was so much more to her than a suit. She spends her weekends mountain-climbing and is going to take three months off work to climb Everest. It was fascinating talking to her. I've been wrong all my life, business people are a lot cooler than I thought. Then I decided to get up and go for a walk down the train. I met a woman who had been a student at my school seven years before and knew lots of my teachers. It seems my teachers were just as strict then as they are now.

People offered each other food and drink. A young woman took out her guitar and soon we were singing along. It was so much fun. While we were singing, we heard there was a diabetic man in another part of the train who was feeling unwell, and the woman from my school

went to help. It turned out she was a nurse, and when she came back she was welcomed as a hero.

Then, after two and a half hours, we started moving again. Everyone clapped and cheered and some

people, complete strangers three hours before, even hugged.

Of course, this journey didn't change anything. I took the train again on Wednesday but none of my new 'friends' were there. All the faces

were new. Although people were polite, they weren't nearly as friendly as the people the day before had been. So I sat down and started texting. But I'll never forget the day the train stopped and people started talking.

TRAIN TO THINK

Exaggeration

When we feel emotional about something, we tend to exaggerate – we call something 'a brilliant idea', 'the best (film) ever', 'an amazing journey', etc. But we often don't mean that literally. As a listener you need to be aware of exaggeration and understand what the speaker is really saying.

1 Read the example and answer the questions.

Last night's train journey was terrible. It was the worst journey of my life. The train was two hours late and then it stopped for ages in the middle of nowhere. I was so bored I thought I was going to go mad. I hope today's journey won't be so bad.

- 1 How many exaggerations does the speaker make?
- 2 What are they?
- 3 What does he really mean in each case?

2 **SPEAKING** Work with a partner. Tell them about something really good or bad that happened to you recently. Use exaggeration.

Pronunciation

Linking words with /dʒ/ and /tʃ/

3 You should come back in August.	c <i>It's the easiest</i> way to travel <i>by far</i> .	iii <i>And it's even</i> warmer than it is now.

2 Make recommendations to visitors to your country using the sentences in Exercise 1 to help you. Then compare with a partner.

You should fly to Astana. It's easily the best way to travel and it's a lot quicker than taking the train.

Five not
so good things
about living
abroad

Regular readers of my blog already know that I'm a student living and studying in France for a year. Overall it's turning out to be a great experience. But today I've decided to write about some of the challenges that living abroad can bring. Here we go.

A It isn't a holiday

You know those Hollywood films where the foreigner is living a nice, easy, comfortable life in another country? Well, forget it – that's not how it is. You have to do all kinds of things like open a bank account, find somewhere to live, pay bills, and so on. These things aren't easy and they take time.

B Language problems

Before I came, I thought my French was pretty good. But being here isn't like French at school was. People talk to me like they talk to each other – fast! There's new vocabulary which you have to pick up and the first time I went to a hairdresser, she couldn't understand a word of what I was saying! If I had practised more at school, perhaps my pronunciation would have been better. Speaking French all day wears me out though. Often, at night, I'll watch anything on TV in English! Anything!

C You might not like it

It's possible that after all the excitement of moving to another country, you become one of those foreigners who is unhappy abroad. I ran into some people who couldn't wait to leave France after just a few weeks. Well, there's no country in the world that suits everybody, right? It's always a risk.

D Homesickness

After a few weeks you'll start to miss all kinds of things (and people) from back home. That special food, that TV programme, the friends who you used to hang out with. Well, it's a phase you have to go through. If you're really homesick, call your family and friends and catch up on all the latest news. Otherwise, keep going, the homesickness won't last forever.

E Not everyone is happy that you're there

Mostly people are kind to me and happy to see me. But there are exceptions. Sometimes I go somewhere and someone says something like: 'Oh, no, another English person!' It's not nice to hear, but you have to put up with it. I find it's best to try and ignore that stuff and concentrate on the nice people I meet. If I had taken all the negative remarks seriously, I'd have been really unhappy! Still, overall, I'm very glad to be here and I have no regrets at all about coming. Sure there are problems but you can run into problems wherever you are. The experience gained by living abroad is invaluable. Living abroad is fun and a huge learning opportunity too. It's made me more aware of the world.

Culture

1 Centuries ago, there was a list of the 'Seven Wonders of the Ancient World'. Do you know any of the things or places that were on that list?

2 Read the article about the New Seven Wonders of the World. Which one is:

the oldest?

the newest?

The New Seven Wonders of the World

Recently, an online poll was held to choose the New Seven Wonders of the World. Over 100 million people voted. Here are the seven winners.

Chichén Itzá, Yucatan Peninsula, Mexico

This was an important city for the Mayans between about 800 and 1200 CE. It was a centre for trade in things like cloth, honey and salt. Most photographs of Chichén Itzá show a 24-metre high pyramid called El Castillo. There is also a ruin known as El Caracol which the Mayans used as an observatory – the view of the night sky from the top is beautiful.

Christ the Redeemer, Rio de Janeiro, Brazil

Built between 1922 and 1931, the 'Cristo Redentor' statue on Mount Corcovado has become a worldwide icon of Brazil. The statue is about thirty metres high and the outstretched arms measure 28 metres end to end. Designed by a Frenchman and built by Heitor da Silva Costa, it attracts thousands of visitors every year.

The Colosseum, Rome, Italy

This famous amphitheatre, built between 70 CE and

80 CE, was used by the Romans for about 500 years for all kinds of public spectacles. Now it is almost a complete ruin, as a result of earthquakes and the passage of time, but some parts can be visited. The Colosseum has become one of the most famous images of Italy.

Great Wall of China, China

This amazing structure was built over a period of more than two thousand years, ending in the 16th century. It was built in order to keep out the hostile tribes of Mongolia on the other side. The Great Wall is not actually just one long wall, but a succession of many different ones. At around 6,500 kilometres, it's the longest man-made structure on the planet.

Machu Picchu, Peru

High in the Andes mountains, the Inca city of Machu Picchu is believed to have been a sacred place for the inhabitants of nearby Cusco. The Incas built it in the mid-1400s, though we don't really know how. The Incas abandoned the city and for many

years, only local people knew about it, until it was rediscovered in 1911. Many tourists go there, mostly by train from Cusco.

Petra, Jordan

The city of Petra flourished from nine BCE to 40 CE. It was the capital of the Nabataea Empire. The city was built in a desert area by the people of this civilisation, who were very skilled at finding and storing water. There are many buildings carved out of stone, an amphitheatre that held 4,000 people and

a monastery.

Taj Mahal, Agra, India

Built of white marble between 1632 and 1648, the world-famous Taj Mahal is one of the most beautiful buildings in the world. It's a mixture of Persian, Islamic, Turkish and Indian styles. It was built by Emperor Shah Jahan as the place to bury his wife Mumtaz Mahal when she died. Inside, there are flower gardens and pools.

3 Which place or thing:

- 1 is in a desert?
- 2 has architecture from different places mixed together?
- 3 has been damaged by natural events?
- 4 was designed to protect the people who built it?
- 5 was built in ways we don't really understand?
- 6 took nine years to construct?
- 7 was used to look at the stars?

4 VOCABULARY Match the highlighted words in the article to the definitions.

- 1 left the place for ever and never went back

- 3 grew, developed very successfully
- 4 unfriendly and aggressive, wanting to attack
- 5 a famous thing or person that represents a group or country
- 6 exciting public shows or events
- 7 one thing coming after another
- 8 made by cutting

- 2 Think of two things from your country that you could campaign to be included in a list of seven wonders of the world. Give reasons to support your choice.

WRITING

Essay

- 1 Read Javed's essay. Why does he think the Simplon Tunnel is a modern wonder of the world?
- 2 Read the essay again. Ten things are underlined. Five of the things are mistakes, the other five are correct. Find an example of:
 - a spelling mistake
 - a mistake with the verb tense
 - a mistake with the wrong choice of connecting word
 - a preposition mistake
 - a mistake which is a missing word

3 Correct the mistakes in Javed's writing.

4 Look again at the list of kinds of mistakes in Exercise 2.

- 1 Are there other kinds of mistakes that people make in writing? What are they? (e.g. punctuation, ...)
- 2 Does the list in Exercise 2 show the kinds of mistakes that you have sometimes made in your writing so far using this book? If you've made other kinds of mistake, what were they?
- 3 Make a checklist for yourself of 'Mistakes I should try not to make when I write in English'.

5 You're going to write an essay entitled: 'A Modern Wonder of the World'.

- 1 Look at question 2 in the Speaking exercise above. Choose one of the things that you discussed there.
- 2 Make notes about why you think this thing is a good choice for a modern wonder of the world.

6 Write your essay in 150–200 words.

- Make sure you state clearly what your choice is, and say where and what it is.
- Give reasons for your choice being a 'wonder of the world'.
- When you have written your text, read it through again and use your checklist of personal mistakes (Exercise 4.3) to make as sure as possible that there are no mistakes in your writing.

A Modern Wonder of the World: The Simplon Tunnel

My choice for a modern wonder of the world is the Simplon Tunnel ¹ at Switzerland. It's actually two tunnels – railway tracks run through both of them. They're each almost twenty kilometres long, so they're not ² ... longest tunnels in the world now, but they were when they were built, back in the beginning ³ of the twentieth century. The first one was started in 1898 and opened in 1906. The other one was started in 1912 and was opened in 1921, so each one ⁴ has taken about eight years to construct.

The first tunnel was built by drilling in both directions – when the two drill-holes met in 1905, they were only two centimetres out of alignment. In those days, that was a fantastic achievement.

While it ⁵ was being built, about 3,000 people worked on the construction every day. The working conditions weren't very good – for example, it was often very hot inside – and more than sixty people died ⁶ while the building of the tunnel.

The tunnel joins Switzerland and Italy, ⁷ and it has helped to make ⁸ ... travel between the two countries a lot easier ⁹ then it was before. Now, people can put their car on the train and take it through the tunnel, and so they don't have to drive over the Simplon Pass.

I think this was a great thing to build all those years ago and it has made a big difference to the ¹⁰ whole of that part of Europe.

EXTRA READING

1 PRE-READING Where is Bektau-Ata? What kind of place is it?

Beautiful Bektau-Ata

A secret worth keeping

When I first met Timur I thought he was a really cool guy. He did extreme sports and he took amazing videos of the places in Kazakhstan that he explored. I met him through my cousin Oleg when he invited me to join them on their trip to Bektau-Ata. It turned out to be one of the best experiences I've had.

I guess Bektau-Ata isn't very well-known abroad or even in Kazakhstan, but I wish I'd heard of it earlier. It's a mountainous area in the Kazakh steppe, about 70 kilometres north of Balkhash. Timur's dad drove us there in his jeep. We tied our bikes on top of the car with all our camping gear. It was a three-hour drive, but what we saw when we got there was certainly worth it.

I'd never seen such a strange, yet beautiful place. The ground was made of rock and there were holes in the rock that were filled with rain water. We rode our bikes on this hard surface and Timur made videos with his small camera on his helmet. I'd never felt so free in all my life.

We then found a place to camp the night and Timur's dad lit a fire. We had something to eat and looked at the stars. There were so many, I felt dizzy. Back home, there's too

much light pollution to see the stars. If only I'd brought my camera with me. I could've taken some great photos to show my parents and my sister. But, unfortunately, I'd forgotten to pack it.

Although all the cycling had worn us out, we sat around the campfire till late. We all took turns to tell a joke or a story. Timur's dad used to be a sailor and he had some amazing stories to tell from around the world. And Timur is really funny. I wish I'd met him before and gone on more trips with him.

Sleeping in the tent wasn't as comfortable as I'd hoped. I shared the tent with Oleg and I had to put up with his snoring. If only I'd packed my earplugs! But other than that, it was really peaceful. We only heard animals in the distance, but I didn't feel scared. We got up before sunrise and hiked up Mount Pik, one of the Bektau-Ata peaks, which took us a couple of hours. The views were spectacular!

After that, we biked around a bit more before packing everything and heading home. On the way back, Timur and Oleg talked about planning a trip to Kiin-Kerish. They asked me if I wanted to go along and I'm sure you know what my answer was.

2 Read the blog entry. Then mark the sentences T (true), F (false) or DS (doesn't say).

- 1 Oleg introduced Timur to Arman.
- 2 Bektau-Ata is a popular place with locals and tourists.
- 3 Timur's dad had driven to Bektau-Ata a few times in the past.
- 4 It was dangerous to cycle in Bektau-Ata.

SMART SCREENS?

1

How much screen time do you allow your children? This has become one of the most challenging issues for parents today. Most experts agree that screen time should be limited and warn against allowing children to spend too long in front of a screen. However, it's not always so easy to follow their advice. Clearly children can't see how harmful spending too much time in front of a screen can be. Furthermore, peer pressure means that children think their parents are being unfair when they say they must switch their electronic devices off. This often leads to stressful family situations. It's easy to see why so many parents give in and let their children look at screens for far too long. Unfortunately, this creates greater problems in the future, such as the negative effects on their ability to concentrate, their fitness levels and mood. The more screen time children have, the more irritable they become. Of course, this situation isn't new. It started when the TV became popular in the 1960s, but modern screens have made it a lot more serious.

2

Most modern cities, rather than being dark at night, are filled with artificial lighting. Huge TV screens and neon signs are making it difficult for many residents to get a good night's sleep. One city has decided to take action against this night time pollution.

With a population of over 11 million, São Paulo is the biggest city in Brazil and one of the ten biggest cities in the world. Not so long ago, the local government decided to pass the 'Clean City Law' which said that large outdoor advertising was not allowed any more. So, all existing signs had to be taken down despite the financial losses it meant for the city. The advertising companies were not happy but the people living in the city were, with more than 70% agreeing that the new law had improved their quality of life.

3

Mobile phones have become such an important part of our lives that it's difficult to imagine how we could live without them. Of course, making and receiving calls is only one of their functions. We use them to take photos, record videos, check our email and social media accounts, surf the Internet, give us directions, play games, shop, check in for a flight, the list seems almost endless. But it wasn't all that long ago that people didn't need mobile phones and managed to live without them quite easily and maybe we were all just a little bit happier. In the old days, if you wanted to call someone, you phoned their house. If they weren't home, it was just bad luck. However, because the mobile phone is mobile, we now phone the person directly and if they don't pick up immediately then we get annoyed. We expect people to be reachable all day every day. As a result, no one is allowed to relax any more. We're supposed to answer our phones whether we're at work, at home, on holiday or even asleep. We have lost the ability to be unavailable and to truly switch off.

TRAIN TO THINK

The PMI strategy

A good brainstorming strategy you can use when making decisions is the PMI strategy. On a piece of paper, draw three columns and head them 'plus', 'minus' and 'interesting'. Write down the positive consequences (plus) and negative consequences (minus) of taking the decision, and also what would be 'interesting' about carrying it out.

1 Look at the example below. Can you add any more ideas to the columns?

Books should be banned from schools

plus	minus	interesting
Lessons would be more interactive. Students wouldn't have to carry heavy books to and from school.	Students would spend even more time looking at screens.	How would this change teachers' lives?

2 **SPEAKING** Work in groups. Choose one of the situations. Use the PMI strategy to come to a decision.

- Your school has been asked to put on a play but you and your friends are not sure if you should take part as it will mean staying after school for the next six weeks.
- Your group has been asked to take part in a reality TV show. It involves living without any technology for a month. You are not sure whether you should take part.
- Your group has been invited to make a recommendation to the public transport service of your town as to whether mobile phones should be forbidden on buses, trains and trams.

- 2 What does it show?
- 3 Who started the project?
- 4 What inspired them to start the project?

Great success for teenage teachers: When silver surfers get connected

A new documentary called *Silver Surfers* shows the inspiring story of a group of teens helping elderly people to improve the quality of their lives by teaching them how to make use of the Internet. The people were aged between 76 and 93.

Rosemary Raynes, the director of the documentary, got the idea for the film when talking to her sisters Poppy and Amy about a project they had started several years before in Kingston, Canada. The two teenagers and a group of friends had a clear goal: they wanted to help elderly people to feel more connected to other people, through the use of the Internet.

They started the project after seeing how the Internet had changed their own grandparents' lives. Their grandparents could use the Internet at a basic level but wanted to become more proficient. After the two girls had given them a few basic IT lessons, they were able to use the computer confidently, and became enthusiastic

users of Skype, Facebook and email.

The two students were so motivated by that success that they got several of their friends to join them. Together, they started to visit a local home for elderly people. Many of the people there couldn't even switch on a computer without help. But the young people were amazed how much they had learned after only a few lessons.

It's fascinating to see how the silver surfers featured in the film all had very different interests. Some of them wanted to use Facebook to stay in touch with family members who had emigrated to countries as far away as Australia. Others were keen to get ideas for travelling, learning how to play an instrument or cooking.

The outcomes of the project were amazing: 89-year-old Sheila, together with a friend, managed to create a YouTube cooking tutorial; 93-year-old Marilyn succeeded in making a rap video. Albert, 89, wanted to learn how to use the web to reconnect online with people he hadn't seen in decades. He managed to use his new skills to reunite with his daughter, who he had lost touch with.

The documentary has been met with great enthusiasm in several countries, and a number of follow-up projects have been launched. They are all aimed at helping elderly people to explore the benefits of technology, have fun, and stay in touch with others – thanks to a wonderful initiative by two teenage girls.

THINK SELF-ESTEEM

Learning from elderly people

- 1 You're going to talk about an elderly person who has qualities that you admire. Make notes on why you admire this person.
- 2 Which of the qualities you have noted do you think you would like to have in your own life?
- 3 What could you do to develop those qualities?
- 4 **SPEAKING** Discuss your ideas with your partner.
- 5 **WRITING** Write a paragraph that summarises what it is you have learnt by thinking about the person.

One of our neighbours is a man called Mr Carter. He is over 80 years old, but in many ways he seems to be very young. He's got an excellent sense of humour, and I've had great conversations with him. He's a very good listener, and asks very interesting questions. If there is one thing I would like to learn from him for my own life then it is the way he seems to set goals for himself. For example, Mr Carter has a little swimming pool in his garden, and he goes for a swim every day, no matter what the weather is. And the weather can be quite cold at times where we live!

Culture

Great scientists

- 1 Look at the photos. What things can you see in each one?
- 2 Read the article about six scientists. Number the photos 1–5.

C

1 Galileo (Italy, 1564–1642)

Galileo – his full name was Galileo Galilei – is sometimes called ‘the father of modern science’. He was a scientist, mathematician and astronomer. In Galileo’s lifetime, telescopes were new and were still quite **basic**. Galileo made improvements to the design, including more powerful lenses, and was the first person to see the four large moons of the planet Jupiter.

His best-known **achievement** was to show that the Earth moves around the sun, and not the sun around the Earth (although he was not the first person to have the idea).

D

2 Kanysh Satbayev (Kazakhstan, 1899–1964)

Kanysh Satbayev was one of the founders of metallogeny in Kazakhstan. In other words, he studied how minerals (like gold, copper or iron) found in rocks **affect** the Earth’s crust and make it different from one region to another. He was the first Kazakh geologist who studied metals in central Kazakhstan, in the copper field of Ulutau-Zhezkazgan. Satbayev became interested in geology when he was young, thanks to the geologist Mikhail Usov. He went on to found the Institute of Geology, and was the first president of the Kazakhstan Academy of Sciences in Almaty.

E

3 Karl Landsteiner (Austria, 1868–1943)

Based in Vienna, Austria, Landsteiner was involved in many research projects and made several key discoveries. Together with a man called Erwin Popper, he helped to **identify** the virus that causes the disease polio.

But even more importantly, in 1901, he discovered the three main blood groups – A, B and O – and showed that it is possible to transfer blood from one person to

another person. This led to the first ever blood transfusion in 1907, in New York.

4 Francis Crick (Britain, 1916–2004) and James Watson (USA, born 1928)

In 1953, in Cambridge, UK, Crick and Watson announced to the world that they had found ‘the secret of life’. The secret is the **structure** of DNA, the material that makes genes, the things we get from our parents that control how we grow. Their discovery meant that we now know much, much more about the human body. And with that knowledge, there have been **enormous** improvements in medicine and medical research, as well as in historical research and solving crimes.

3 Read the article again and write the names of the scientists.

Which scientist (or scientists) ...

- 1 ... studied what's under the surface of our planet?
- 2 ... demonstrated the Earth's movement in space?
- 3 ... worked with animals?
- 4 ... did work that helped medicine?
- 5 ... started a new science?
- 6 ... invented something to stop diseases?
- 7 ... improved a piece of equipment?
- 8 ... did work that helped historians and detectives?

4 **SPEAKING** Discuss the questions.

- a Which of the scientists do you think is the most important? Why? Share your ideas with the class.
- b There is only one woman here. Why do you think this is?

WRITING

Instructions

1 Read the instructions on how to save a Word file. Who do you think it has been written for and why?

2 Complete with the missing words. Then check in the instructions.

- 1 _____ your file is a written document, _____ you will be using a word processing program.
- 2 The _____ _____ you need to do is to create a new file.
- 3 _____ _____ this, open up the program.
- 4 _____ save the file, click on 'file' again.
- 5 _____ _____ you will be able to find your file easily.
- 6 _____, when you close your document, a dialogue box will appear.

One of the most important things you need to learn to do when using a computer to write documents is to learn how to save a file.

- 1 If your file is a written document, then you will be using a word processing program such as Microsoft Word. The first thing you need to do is to create a new file. To do this, open up the program by clicking on the icon.
- 2 When the program has opened, click on the icon 'file' in the top left hand corner of the screen and choose 'new' from the drop down menu. This will create a new document for you.
- 3 I recommend saving this document before you write anything. This means that if your computer shuts down unexpectedly, you won't lose the file. To save the file, click on 'file' again. From the drop down menu choose 'save'.
- 4 A dialogue box or window will open asking you to type in the name of your document. You will also need to choose a location for the file. Select 'desktop' from the list on the left hand side of the box. This means you will be able to find your file easily when you start your computer.
- 5 Finally, when you close your document, a dialogue box will appear asking if you want to save any changes. Click 'yes'.

- 3 **SPEAKING** Discuss why the following tips are important when writing instructions.

Tips for writing instructions.

- Think carefully about who you are writing for.
- Use clear language that is easy to understand.
- Give the instructions in a logical order.
- Use a friendly, informal style.

- 4 Choose one of the computing processes below and write down short notes for each stage.

- how to create a folder
- how to change the font
- how to cut and paste
- how to rename a file

- 5 Write a text (120–180 words) describing the process you chose in Exercise 5. Remember to:

- decide who you are writing these instructions for (a child? a beginner? a fairly experienced user?).
- give your instructions in a logical order.
- think about the tips in Exercise 4.

EXTRA READING

- 1 **PRE-READING** What problems related to water will we face in the future? What can we do about them?

Water

A treasure in Kazakhstan

Kazakhstan is a country with a lot of natural resources, such as reserves of coal, oil, gas and uranium. However, with the annual rainfall decreasing by 0.5mm every decade, it doesn't have large water reserves. Water is necessary not only for people to live healthy lives, but also for the country's economy. Kazakhstan is currently one of the largest producers of wheat in the world, but industries such as agriculture and mining require a lot of water.

Unfortunately, water shortage is already a serious problem faced by millions of people on a global scale, and a UN report estimates that by 2050 this number could be as high as 5 billion. We are all responsible for future generations' access to clean water and some say we should have started protecting the world's water reserves a long time ago. But there's still time and there are interesting things happening around Kazakhstan today to ensure everyone has access to safe drinking water in the future.

New water-saving technologies are being applied to use water more wisely in agriculture. These technologies are hydrogel, agro textiles and drip irrigation. Hydrogel is a type of material that looks like gel, which scientists inject into a plant's roots. This material helps the plant to absorb water even when there is very little of it in the soil. So, the plant grows faster than plants that don't have hydrogel. Agro textiles are fabrics which farmers use to cover the crops to shelter them from extreme weather, as well as from birds, insects and weeds. This material still allows enough sun and rain to reach the plants so that they can grow. The other water-saving technology used in Kazakhstan is drip irrigation. Long pipes bring small amounts of water to the roots of the plants. This is a more efficient way of watering crops because the water goes directly to the roots and is not wasted through evaporation.

These technologies are now used in more than 150 farms in the northern parts of Kazakhstan, like the Kostanay and Akmola regions. The results are already promising. The farms are producing a good number of strawberries in summer even though there's not much water available there during that time of year because of droughts. Perhaps we shouldn't have doubted that scientists would find a way to fight the problem. But there is still a long way to go before the world is free from the problem of water shortage.

2 Read the text. Answer the questions.

- 1 Why is rain a problem in Kazakhstan?
- 2 How does Kazakhstan's economy depend on water?
- 3 What three water-saving technologies are used by Kazakhstani farmers today?
- 4 What part of a plant is injected with hydrogel? How does this help it?

2  SB32 Now read and listen to the photostory. Check your answers.

FLORA Hi, Leo. Hi, Jeff.

LEO Hi, Flora.

FLORA Hey, has either of you seen Mia lately?

JEFF No. I haven't seen her for ages, actually.

LEO Now you mention it, neither have I.

FLORA It's strange, isn't it? She hasn't been to the café for a long time. I wonder what she's up to.

LEO Hey, look who it is. Hi, Mia! We were just talking about you. Where have you been hiding?

MIA Don't even joke about it. I never have time to do anything any more.

FLORA Come and sit down. I'll get you something to drink.

MIA You're a star. That's just what I need.

LEO It's Thursday today.

MIA I know. I'm only here because orchestra was cancelled this week. Thank goodness.

CHLOE Don't be silly. I'm sure it'll be fine. Look, Mr Wales wants to start. Come on, Mia.

MIA Here we go. I am *not* looking forward to this.

MIA Not really. I mean, I like playing an instrument. I just don't think I want to continue with the violin. Do you know I spend up to an hour every day practising?

FLORA So why do you do it?

MIA To keep my mum happy, I suppose.

JEFF You should talk to her, tell her you want to give it up.

MIA Yeah, maybe. But it's not always so easy to talk to her.

FLORA Well, you need to do something. You don't have any time for yourself. I mean, we never get to see you any more.

JEFF Don't look now, but Richie Ford's sitting behind you.

LEO Let me guess: he's doing something on his computer.

JEFF Got it in one.

LEO He spends all day on that thing.

JEFF I know. Hasn't he got a life?

FLORA Pack it in, you two. You're being mean.

MIA Yeah, and he can probably hear what you're saying.

JEFF No, it's all right. He's got his earphones in. He's such a nerd.

FLORA Oh, come on, Jeff. That isn't nice.

JEFF I didn't say there's anything wrong with being a nerd.

MIA No, but that's what you meant.

JEFF No, it isn't.

FLORA Then why use that word?

MIA Just because he's into computers and he wears glasses, it doesn't mean he's a nerd.

LEO I'm with you on this one, Jeff.

MIA What does that mean exactly?

LEO Don't get me wrong. I've got nothing against nerds. After all, my brother's one! But Richie Ford is most definitely a nerd.

JEFF Yeah, all we're saying is that he should get off the computer now and then and actually meet some people.

FLORA And how do you know he hasn't got lots of friends?

JEFF Well, yes, OK – for all I know he's got loads of friends somewhere. But he's always on his own at school.

LEO That isn't true at all. He's got his best friend: his computer.

FLORA Sometimes I just don't know why I'm friends with you two.

MIA Boys. They're all the same.

LEO Sorry, Flora, I can't help you with this one. Error code 324, you say? I've never even heard of that one before.

FLORA Oh, no, Leo. You were my only hope. Ugh, this computer!

LEO Now, if you were friends with Richie Ford, of course ...

FLORA Stop that. It isn't funny. And anyway, if you knew as much as him, then maybe you *would* be able to help.

LEO Yeah, good point. I'll shut up.

FLORA So what am I going to do about my computer?

LEO Take it in and have it fixed, I suppose. There's that new computer shop down Brook Street. I hear they're really good.

FLORA Yeah, I'll have to take it in tomorrow. I'm so tired of all the problems I keep having with this computer.

I want to get it fixed once and for all. Thanks for trying, anyway.

Strapped for cash

2  SB35 Now read and listen to the photostory. Check your answers.

LEO I'd really like one of these fancy desserts. Like this one, with nuts and everything, and the banana ...

FLORA A banana split! Mmm, they're amazing. Let's see. Oh, they're £6.99. I don't have that kind of money.

MIA Tell me about it. I'd really like one of those hot chocolate drinks with all the extras. But I just can't afford it.

LEO Well, don't look at me. I'm broke too. No banana splits for me either, I'm afraid. *(Jeff arrives)*

JEFF Hi, you lot. Wow, you don't look very happy.

MIA Just feeling sorry for ourselves. We're all strapped for cash, same as usual.

JEFF Ah, well, in that case, you should be *really* happy to see me!

LEO And why's that, Jeff?

JEFF Look what I found! Outside here, on the street, by the shoe shop. My lucky day, eh? And your lucky day, too! Let's go crazy – desserts are on me!

MIA But, Jeff, the money isn't ours. We can't just spend it on ourselves like that.

JEFF Why not? There's no way to find the person who lost it, is there?

MIA I'm just saying it doesn't feel right, that's all.

JEFF Don't be silly. Come on, order whatever you want.

LEO OK. If you say so, Jeff!

WAITRESS The usual, Mrs Brady? A large coffee?

MRS BRADY I'd better have a small coffee today. You know, this morning I lost £20.

WAITRESS Oh no! That's a shame. I'm really sorry to hear that.

MRS BRADY Yes. I must have lost it around here somewhere. That's a lot of money for me.

WAITRESS Oh dear! What a pity! Never mind – maybe you just misplaced it and you'll find it again.

MIA Did you hear that? We ate the old lady's money!

FLORA I know. How awful!

EMMA It's been such a busy week.
 LIAM Too right. So many things to do.
 NICOLE Same here. And all of these projects for school. It's been fun, though. Hasn't it, Justin?
 JUSTIN Sorry?
 EMMA Oh, come on, Justin. You're not listening to us at all.
 NICOLE Always on your phone doing something or other.
 JUSTIN Sorry. I know it's a bad habit, but whenever someone texts me I've just got to reply right away.
 NICOLE Seems like we're not important to you any more. You're constantly on the phone. Oh, sorry. Oh, hi, Julia. Yeah ... sure I'm going ... yes, we're all going ... No idea ... Hang on a sec. Let me ask ... Guys? When's the Chilly Balloons concert? Is it next week?
 JUSTIN On the 7th, nine o'clock.
 NICOLE Julia? On the 7th at nine o'clock ... I'll be at home, I guess. Sure ... OK. Well, I have to be off now, but give me a shout over the weekend when you have time. OK, bye! ... Right. Where were we?
 JUSTIN Seems like we're not important to you any more. You're constantly on the phone.
 NICOLE Hang on – it was Julia and it was important. I was only helping her.
 EMMA Did you hear that the cheapest tickets to the concert are £42?
 LIAM What? That can't be right. Let me check. Here we are. Chilly Balloons ... Saturday 7th ... tickets from £25.00 to £100.00.
 EMMA Oh, that doesn't sound too bad.

Thanks,

Liam.

NICOLE You know what? We're telling Justin off for being on his phone too much, but we're all just as bad.
 JUSTIN Ha! True! Hey, I challenge us all *not* to use our phones for the whole weekend. Not once. I bet you can't.
 NICOLE Ridiculous. Of course we can. Why wouldn't we be able to?
 EMMA Oh, come on. Three days without a phone? No problem!
 JUSTIN OK. Let's try it, shall we? You'll never survive the weekend without your phones. You'll see. Anyone who uses their phone has to treat the others to coffee or whatever they want at the café.
 OK?
 EMMA OK. I'm in.
 JUSTIN No phones, right up to Monday morning, starting now. Deal?
 OTHERS Deal!

1

TEACHER OK, everyone, so this is what I want you to do by Friday, OK? A short story, of five hundred words.

EMMA Five hundred words!? She can't be serious!

TEACHER ... and the story has to end with the words, 'Thanks, you saved my life!'

EMMA What? This is awful. I can't do that. I'm hopeless at writing stories.

TEACHER It has to be original, though. No using old stories and changing them a bit here and there. I want something that's yours and yours alone. Be creative! OK, end of lesson. Bye!

2

EMMA And she wants it by Friday! That's the day after tomorrow. I'll never come up with anything by then. An original story? Me? No chance.

LIAM Sounds like you've given up without even trying.

NICOLE Liam's right, Emma. I mean, come on, it can't be that hard, can it?

EMMA An original story, five hundred words long? I think that's pretty hard.

JUSTIN What's the ending again?

EMMA Someone says, 'Thanks, you saved my life!'

JUSTIN OK, that's five words. So far, so good. All you need is another four hundred and ninety-five.

EMMA You know, Justin, I may not be very good at creative writing but I can think of a few words for you right now!

NICOLE OK, calm down.

JUSTIN Well, I'm sorry, Emma. But you know, all you've got to do is think of a story you've read or a film you've seen ...

EMMA No, no, that's just it – it has to be original.

EMMA OK, well this isn't getting me anywhere. And I've got to go home. I'm off – I'll see you lot later. And thanks for all the help, Justin! You're a real pal – not.

JUSTIN Hey, what did I do?

LIAM Well, you were a bit out of order, Justin. You can see that Emma's stressed out already, and you didn't exactly help, did you?

LIAM Well, there must be some stories she's never read.

EMMA You don't know Miss Jenkins. She's read every book, seen every film ...

JUSTIN Why don't you write a story about a girl who's got to write a story, and her friends give her a great idea and then she says 'Thanks, you saved my life!' The hero could be a really cool guy called Justin.

NICOLE Give it a rest, Justin!

JUSTIN Yeah, he showed me some of his photos the other day too – pictures of some trees that he thought looked cool, but I wasn't that impressed. They were out of focus for a start!

NICOLE He hasn't shown me any of his photos yet. Are they really that bad?

JUSTIN I'm afraid so. They're the sort of thing you might post online and get a few 'likes' but they're certainly not going to win any competitions.

EMMA But that's just it. He thinks he's got a good chance. I don't want him to get his hopes up.

JUSTIN He's got no chance at all.

NICOLE So, what are we going to do? We can't let him make a fool of himself.

EMMA I don't know. I tried to tell him they weren't that good, gently of course, but you know Liam.

JUSTIN Yes, it can be difficult to tell him things sometimes. He's always so enthusiastic.

NICOLE Well, we have to do something.

EMMA I've got an idea.

NICOLE What?

LIAM So, what about this one, Emma? This was the sunset outside our house yesterday. What do you think? Pretty amazing, isn't it?

EMMA Um. Yes, it's pretty ... um. It's pretty! It's the best one you've shown me so far.

LIAM I'm really getting into photography. And I've only been doing it for two months or so. It's amazing what great photos you can get just using your phone.

EMMA Yes. Yes, I guess so.

LIAM Anyway, there's a photo competition next month at school that I'm thinking of entering. First prize is a tablet. I think I've got a really good shot.

EMMA That's great. Go for it.

EMMA Well, you said he hadn't shown you his photos yet. Why don't you ask to see them and then tell him the truth?

NICOLE Oh thanks. So I get to be the bad guy? And I haven't even seen them! Maybe I won't think they're bad.

EMMA Fair enough. But if you do agree with us, then you've got to stop him! It's too late for us to say anything.

JUSTIN Yeah, we can't tell him now. You have to try at least.

NICOLE Ha, ha. Very funny. But surprisingly enough, you're wrong.

EMMA OK, you were halfway here when you realised you'd forgotten your phone so you had to go back and get it.

NICOLE No, but that's a pretty good guess. Have another go.

LIAM I know. You stopped at the supermarket to buy us crisps or chocolate or something. Please say I'm right. I'm starving!

NICOLE No, sorry.

EMMA This is way too difficult. I hate guessing. Give us a hint at least.

JUSTIN So where's Nicole? We're going to miss the bus.

EMMA We've still got a few minutes. She'll be here. She's not going to miss a trip to the skate park.

JUSTIN Well, text her. It'll be here any minute.

LIAM No, don't bother. Here she is. Come on, Nicole. Hurry up!

LIAM Who on earth is Ben Anderson?

JUSTIN That new guy in Mrs Brooks' class. Tall, dark hair, sporty. Nicole really likes him.

LIAM Oh really? Tell us more!

NICOLE It's none of your business, Liam. And in any case, Justin's wrong. Well, about why I'm late, at least. More guesses!

EMMA No, Nicole, we give up. You're going to tell us eventually anyway.

NICOLE Fair enough. Are you ready? I am going to be on television tonight! On the news.

JUSTIN You're what?

GET IT RIGHT!

UNIT 1

Future continuous vs. future simple

Learners often confuse the future continuous with the future simple.

We use the future continuous to talk about events which will be in the process of happening at some time in the future.

✓ This time next week I'll be sitting on the beach in Aktau.

✗ This time next week I'll sit on the beach in Aktau.

Decide if the sentences can be written in the future continuous. If so, rewrite them using this tense. What's the difference in meaning between the future simple and future continuous form in these cases?

0 When you get to the station, I'll wait for you at the main entrance.

When you get to the station, I'll be waiting for you at the main entrance.

1 This time next year we'll be at university and we'll live away from home.

2 I'll have a look in my diary and see if I'm free on the 5th.

3 This time next week I'll do my final exams. Scary!

4 Some people think that tablets will soon replace laptops.

5 I'll play hockey when you arrive at the station tomorrow but Chloe can meet you.

6 I think you'll have a good time when you go to Spain.

UNIT 2

Verb patterns

Learners often use the wrong verb form after certain verbs, using the gerund instead of *to* + infinitive and vice versa.

✓ I'm looking forward to going to the festival.

✗ I'm looking forward to go to the festival.

Which of these sentences are correct and which are incorrect? Rewrite the incorrect ones.

0 Arman was looking forward to climb the cliff.

remember, try, stop, regret and forget

Learners often use the wrong verb form after the verbs *remember, try, stop, regret and forget*, which can all be followed by both the gerund and infinitive but with different meanings.

✓ I really think you should *stop smoking*.

✗ I really think you should ~~stop to smoke~~.

Choose the correct verb form.

- 8 I regret *informing* / *to inform* you that there are no places left on the course.

UNIT 3

We use the past simple passive to refer to events which took place in the past.

- ✓ *I was really surprised when I first read the email.*
- ✗ *I am really surprised when I first read the email.*

We use the present simple passive for events which have started and are still going on now.

Match the two parts of the sentences and rewrite them as one sentence using either *that* or *which*. Use *that* where possible.

- ✓ He asked me *if I wanted to go*.
- ✗ He asked me ~~*did I want*~~ to go.
- ✓ The teacher asked me how old *I was*.

Second conditional tenses

Learners sometimes use the wrong tenses in the clauses of the second conditional.

We form the second conditional by using the past simple tense in the *if* clause, and the *would* form in the main clause.

✓ *If I knew what to do, I would do it.*

We use *if* to indicate possible actions or events.

✓ *It'll be best for us if everyone goes by bicycle. Car parking facilities are limited.*
